Backgammon is a fun strategic game played by two players Be the first player to remove all your checkers from the board to win this game Backgammon is easy to learn but takes time to master The object of Backgammon is to move your checkers around the board by rolling dice The number rolled equals the number of points a checker can move First move all your checkers to your home board Second move all your checkers off the board The game begins with each player rolling one die The player with the higher number rolled gets to use both dice for the first move Each dice is moved separately and can be moved forward to any point that is not blocked When your opponent has two or more checkers on a point that point is blocked If the point has your own checkers no checkers or only one opponent checker the point is open When both dice are rolled with the same number the player will move double For example if double threes are rolled the player will move three points four times When a player moves a checker onto a point that only has one opponent checker the opponent s checker is placed on the middle bar Any checker on the middle bar has to be returned into play before making any other moves A checker returns to the board on your farthest point i e the 24th point Get your copy today by scrolling up and clicking Buy Now to get your copy today **Backgammon** Robin A. Clay,1993 This book explains the basics of backgammon concisely and clearly and then goes on to discuss tactics and aggressive and defensive styles of play
