- b. Private-sector investigations can become criminal investigations and public-sector investigations can become civil investigations depending upon the circumstances.
- c. Public-sector investigations involve government agencies responsible for criminal investigations and prosecution. Private-sector investigations focus more on policy violations.
- d. The private sector can ignore criminal investigations, and the public sector can ignore civil investigations.

ANSWER:

b, c

RATIONALE:

In general, the main difference between public-sector and private sector investigations is that the public-sector investigations involve government agencies responsible for criminal investigations and prosecution. Government agencies range from municipal, county, and state or provincial police departments to federal law enforcement agencies. These organizations must observe legal guidelines of their jurisdictions. Private-sector investigations focus more on policy violations. However, criminal acts, such as corporate espionage, can also occur. So, although private-sector investigations often start as civil cases, they can develop into criminal cases; likewise, a criminal case can have implications leading to a civil case.
