Stored-Product Insect Resource David Hagstrum, 2009-01-01. *Stored Product Insect Resource* *Miniature Lives* Michelle Gleeson, 2016-03-01. We can't avoid insects. They scurry past us in the kitchen, pop up in our gardens, or are presented to us in jars by inquisitive children. Despite encountering them on a daily basis, most people don't know an aphid from an antlion and identifying an insect using field guides or internet searches can be daunting. *Miniature Lives* provides a range of simple strategies that people can use to identify and learn more about the insects in their homes and gardens. Featuring a step-by-step illustrated identification key and detailed illustrations and colour photographs, the book guides the reader through the basics of entomology, the study of insects. Simple explanations, amusing analogies, and quirky facts describe where insects live, how they grow, and protect themselves, the clues they leave behind, and their status as friend or foe in a way that is both interesting and easy to understand. Gardeners, nature lovers, students, teachers, and parents and grandparents of bug-crazed kids will love this comprehensive guide to the marvellous diversity of insects that surrounds us and the miniature lives they lead.

Photographic Atlas of Entomology and Guide to Insect Identification James L. Castner, 2000. Although photo atlases in other fields of the life sciences have long been available to aid students in their studies, there has never been one for entomology. One reason for this is the great number of photos necessary for such a book to be of any value. Fortunately for students, Dr. Castner has spent the past 25 years photographing insects, with his work appearing in everything from *National Geographic* to *Ranger Rick*. Dr. Castner's experience in teaching and working with students has allowed him to produce a work that exactly addresses their needs. His *Photographic Atlas of Entomology* is simple, thorough, user-friendly, and very reasonably priced. It should be a great help to any entomology student as well as to the professors teaching entomology courses.
