often they're used just to illustrate a particular piece of syntax with no filtering on what's most useful. What you'll get with SQL Practice Problems is the problems that illustrate some of the most common challenges you'll run into with data and the best most useful techniques to solve them. These practice problems involve only Select statements used for data analysis and reporting and not statements to modify data, insert, delete, update, or to create stored procedures. About the author: Hi, my name is Sylvia Moestl Vasilik. I've been a database programmer and engineer for more than 15 years, working at top organizations like Expedia, Microsoft, T-Mobile, and the Gates Foundation. In 2015, I was teaching a SQL Server Certificate course at the University of Washington Continuing Education. It was a 10-week course, and my students paid more than 1000 for it. My students learned the basics of SQL, most of the keywords, and worked through practice problems every week of the course. But because of the emphasis on getting a broad overview of all features of SQL, we didn't spend enough time on the types of SQL that's used 95% of the time: intermediate and advanced Select statements. After the course was over, some of my students emailed me to ask where they could get more practice. That's when I was inspired to start work on this book.

Beginning ASP Databases Kevin Spencer, Thearon Willis, John Kauffman, 2003-08-26. This book explains, demonstrates, and applies techniques that intersect with two great tools of the information age. The first tool, the database, is relatively old. On the other hand, the second tool, the Internet, is still quite young. And when you pair these tools, you can create powerful web pages. With the help of *Beginning ASP Databases*, you will learn to incorporate databases into your ASP applications using ADO, which provides a set of objects that you can connect to, read from, and write to. You'll gain comfort installing necessary software, handling stored procedures. And this book will answer many real-world questions, complete with code for you to copy and paste.
