Self-Declaration in the Legal Recognition of Gender
Chris Dietz, 2022-10-21 Self Declaration in the Legal Recognition of Gender examines the impact of legislation premised upon the principle of self declaration of legal gender status Existing doctrinal and comparative analyses have tended to come out strongly in favour of or against self declaration This book offers a socio legal alternative which focuses on how self declaration is experienced on an embodied level by trans and gender diverse people It presents research conducted in Denmark which became the first European state to adopt self declaration in June 2014 By analysing Danish law through a Foucauldian framework which brings together socio feminist and trans legal scholarship on embodiment and jurisdiction the book offers the first empirically based and theoretically informed analysis of self declaration It draws upon legal consciousness affect theory vulnerability and governmentality literatures to argue that the jurisdictional boundaries which existed between law and medicine were maintained throughout the reform process This limited the impact of the legislation enabling access to health care to be restricted in the same year in which amending legal gender status was liberalised As the list of states that have adopted self declaration increases this intervention offers activists and policymakers insights which might shape how they respond to similar reform proposals in the future A timely and important assessment this book will appeal to researchers and practitioners working in trans gender feminist legal and socio legal studies *New York Times Saturday Review of Books and Art*, 1970

A Qualified Teacher in Every Classroom? Frederick M. Hess, Andrew J. Rotherham, Kate Burke Walsh, 2004 A Qualified Teacher in Every Classroom lays out new approaches for ensuring high quality teacher preparation while offering a candid assessment of the obstacles that may impede the implementation of such new models Under the No Child Left Behind Act states will have to ensure that every public school classroom is staffed by a highly qualified teacher This mandate and the fact that many children especially low income and minority students are taught by underqualified teachers ill equipped for the challenges ahead gives new urgency to debates over teacher recruitment preparation and induction For several years these debates have been dominated by competing groups of partisans One denies that teaching requires a professional base of knowledge and skill while the other tries to promote professionalism by ensuring that traditional programs retain their control over licensure and formal certification The conflict confuses policymakers frustrates educators and stifles potentially promising solutions In this volume eleven contributors with rich experience in policy and teaching take a fresh look at a number of issues including Current systems for preparing and licensing teachers and how they affect the quality and supply of teachers in the work force An array of reform models for

teacher preparation and licensure and what they would mean for the profession Questions of rigor and ideology in the core curricula of education schools or programs The federal role in teacher preparation and licensure especially in light of NCLB
