Autosar Runtime Environment And Virtual Function Bus:

Reference Architectures for Critical Domains Elisa Yumi Nakagawa,Pablo Oliveira Antonino,2023-03-14 This book presents reference architecture as a key blueprint to develop and evolve critical software intensive systems emphasizing both the state of the art in research and successful industrial cases After outlining the theoretical foundations of reference architecture and presenting an overview of a number of reference architectures proposed over the recent years this book dives into a set of critical application domains including defense health automotive avionics and Industry 4 0 highlighting the respective most relevant reference architectures that have impacted these domains the experience and lessons learned insights gained benefits and drawbacks and factors that make these architectures sustainable The book finishes with the most relevant directions for future advances in reference architectures The content of this book is useful for researchers and advanced professionals in industry in the areas of computing and engineering as well as in critical application domains that increasingly require interconnected large and complex software intensive systems Algorithm & SoC Design for

Automotive Vision Systems Jaeseok Kim,Hyunchul Shin,2014-06-29 An emerging trend in the automobile industry is its convergence with information technology IT Indeed it has been estimated that almost 90% of new automobile technologies involve IT in some form Smart driving technologies that improve safety as well as green fuel technologies are quite representative of the convergence between IT and automobiles The smart driving technologies include three key elements sensing of driving environments detection of objects and potential hazards and the generation of driving control signals including warning signals Although radar based systems are primarily used for sensing the driving environments the camera has gained importance in advanced driver assistance systems ADAS This book covers system on a chip SoC designs including both algorithms and hardware related with image sensing and object detection by using the camera for smart driving systems It introduces a variety of algorithms such as lens correction super resolution image enhancement and object detections from the images captured by low cost vehicle camera This is followed by implementation issues such as SoC architecture hardware accelerator software development environment and reliability techniques for automobile vision systems This book is aimed for the new and practicing engineers in automotive and chip design industries to provide some overall guidelines for the development of automotive vision systems It will also help graduate students understand and get started for the research work in this field **Towards a Common Software/Hardware Methodology for Future**

Advanced Driver Assistance Systems Guillermo Payá-Vayá,Holger Blume,2022-09-01 The European research project DESERVE DEvelopment platform for Safe and Efficient dRiVE 2012 2015 had the aim of designing and developing a platform tool to cope with the continuously increasing complexity and the simultaneous need to reduce cost for future embedded Advanced Driver Assistance Systems ADAS For this purpose the DESERVE platform profits from cross domain software reuse standardization of automotive software component interfaces and easy but safety compliant integration of heterogeneous

modules This enables the development of a new generation of ADAS applications which challengingly combine different functions sensors actuators hardware platforms and Human Machine Interfaces HMI This book presents the different results of the DESERVE project concerning the ADAS development platform test case functions and validation and evaluation of different approaches The reader is invited to substantiate the content of this book with the deliverables published during the DESERVE project Technical topics discussed in this book include Modern ADAS development platforms Design space exploration Driving modelling Video based and Radar based ADAS functions HMI for ADAS Vehicle hardware in the loop validation systems

Composition of Embedded Systems. Scientific and Industrial Issues Fabrice Kordon,Oleg Sokolsky,2007-12-06 This book constitutes the thoroughly refereed post proceedings of the 13th International Monterey Workshop on Composition of Embedded Systems Scientific and Industrial Issues held in Paris France in October 2006 The 12 revised full papers presented were carefully selected during two rounds of reviewing and improvement from numerous submissions The workshop discussed a range of challenges in embedded systems design that require further major advances in technology

The 30th SIAR International Congress of Automotive and Transport Engineering Ilie Dumitru,Dinu Covaciu,Laurențiu Racila,Adrian Rosca,2019-10-15 This proceedings book includes papers that cover the latest developments in automotive vehicles and environment advanced transport systems and road traffic heavy and special vehicles new materials manufacturing technologies and logistics and advanced engineering methods Authors of the papers selected for this book are experts from research industry and universities coming from different countries The overall objectives of the presentations are to respond to the major challenges faced by the automotive industry and to propose potential solutions to problems related to automotive technology transportation and environment and road safety The congress is organized by SIAR Society of Automotive Engineers from Romania in cooperation with SAE International The purpose is to gather members from academia industry and government and present their possibilities for investigations and research in order to establish new future collaborations in the automotive engineering and transport domain This proceedings book is just a part of the outcomes of the congress The results presented in this proceedings book benefit researchers from academia and research institutes industry specialists Ph D students and students in Automotive and Transport Engineering programs
