learning The Oxford Handbook of Positive Psychology and Disability Erin E. Andrews-Ash, Kara B. Ayers, Dana S. Dunn, Michael L. Wehmeyer, 2026-02-13 Roughly 61 million people with disabilities live in the United States and there are many more millions of people with disabilities around the world. Not surprisingly, differences among and between people with disabilities are often as notable as differences between people with and without disabilities. And while the lack of homogeneity among people with disabilities makes creating a valid taxonomy under this term difficult, if not impossible, there is commonality among and between people with disabilities that justifies an authoritative resource on positive psychology and disability. That is, they have experienced discrimination and marginalization as a function of their disability. This expanded and updated volume assembles chapters by leading scholars in the fields of disability and positive psychology to provide a comprehensive synthesis of the state of the combined field of positive psychology and disability. Chapters are organized into thematic sections beginning with an introductory section providing information on overarching themes in positive psychology and disability. The second section focuses on specific positive psychological constructs that have relevance to disability, including optimism, hope, social well-being, resilience, and positive education. The following section examines systems that take strengths-based approaches to treatment and intervention, while the fourth section looks at the application of positive psychological principles in specific disciplines such as rehabilitation sciences and disability studies. The final section focuses on topics that merit consideration in positive psychology and disability, such as disability ethics, adaptation, and toxic positivity. Disability has always been associated with differentness, and consequently, people with disabilities have throughout time been treated as such. By examining disability from a strengths-based perspective, this volume provides a catalyst to accelerate the application of positive psychology with regard to how disability is understood. **Handbook of Positive Psychology** C. R. Snyder, Shane J. Lopez, 2001-12-20 The Handbook of Positive Psychology provides a forum for examining the more positive side of the human condition. In its pages, readers are treated to an analysis of what the foremost experts believe to be the fundamental strengths of humankind. It looks at the power and vitality of the human spirit as it faces a multitude of life challenges. The Handbook is the first systematic attempt to bring together leading scholars to give voice to the emerging field of positive psychology. **A Practical Guide to Positive Psychology** Bridget Grenville-Cleave, 2012-01-05 Positive psychologists seek to find and nurture genius and talent and to make normal life more fulfilling rather than treat mental illness. This Practical Guide explores how we can all have a life of enjoyment in which we savour the positive emotions that are part of healthy living: a life of engagement where we feel confident we can tackle the tasks we face and a life of affiliation being part of something larger than ourselves. Free of jargon but full of straightforward advice, case studies, and step-by-step instructions, this is the perfect concise start to making your life better. *Bibliographic Guide to Conference Publications* New York Public Library. Students' Psychological Capital on Academic Performance Alex Mbegu, 2026-01-22 Document from the year 2020 in the subject Psychology Work Business Organisation language English abstract The main objective of this study is to examine the role of positive psychological capital on students' academic performance at Tumaini University Dar es Salaam College TUDARCo. Higher education students' academic performance, well-being, and positive development are one among the least studied subjects in Sub-Saharan Africa in spite of the fact that Sub-Saharan Africa is among the largest youth populations internationally. And having several challenges in youth positive development unlike the West, though not majoring in youth population, yet they accounted for most youth development studies. According to Kapinga Amani (2015) who investigated the determinants of academic performance among undergraduate students at Mkwawa University College of Education in Tanzania, they concluded that academic performance in higher learning institutions is partly determined by how well students achieve at the pre-university level. Personal determination and socio-economic factors were similar to a study conducted by Zaituni Shabani (2013) at Aridhi University, who also concluded that pre-university scores and some socio-economic factors are major determinants for students' academic performance for higher education in Tanzania. However, there is very little attention, if not none, that is being placed on positive psychology being a factor contributing to higher students' academic performance in Tanzania. Most researched factors and those that are generally perceived by the public range from gender, learning resources, learning environments, social and economic challenges, and previous academic achievements.
