Rethinking Taxation in Latin America Jorge Atria,Constantin Groll,Maria Fernanda Valdés,2017-11-22 This study of taxation in Latin America takes a novel approach to the subject using a framework that posits three dimensions for studying taxes historical relational and transnational The book argues that first taxation should be understood as a relational concept and tax systems as a function of a strategic nexus between the state and society second that any analysis of tax systems across Latin America needs to take historical legacies of national tax systems into account and finally that transnational phenomena have significant implications for tax regime dynamics in Latin America The essays included provide diverse and representative insights for a new understanding of taxation in Latin America and highlight the bottlenecks to the development of sustainable tax systems in the region exploring new links between academic research and policy making
