Sample Letter Finance

July 13, 2050

Jolie Cassin
Loan Officer
ZenExa
Denver, CO 80202

Dear Ms. Cassin,

I hope this letter finds you in good health and high spirits. I am writing to formally apply for a home loan with ZenExa to finance the purchase of a property located in Atlanta, GA 30301.

I am seeking a loan amount of \$250,000 to cover the cost of the property. I intend to use this loan to secure a mortgage with favorable terms, as I believe that ZenExa offers competitive rates and excellent customer service.

I have attached the necessary documentation, including my financial statements, credit report, and proof of employment, for your review. My current income is \$85,000 per year, and I have a stable employment history in the IT industry.

I would appreciate the opportunity to discuss my application further and explore potential loan options. Please feel free to contact me at your convenience.

Waste-To-Energy in the United States T. Randall Curlee,1994-01-26 This book presents the first comprehensive and unbiased assessment of the social and economic factors that drive decisions about waste to energy WTE projects in the United States Information about each WTE project initiated between 1982 to 1990 is combined with detailed socioeconomic data at the county level to identify the social and economic differences between counties that have completed WTE facilities and counties that have abandoned their projects during the planning process To examine the effects of political objectives public attitudes and the decision process itself the book reports on four in depth case studies two directed at communities that have accepted WTE and two that have canceled WTE projects The book also discusses the potential health and environmental risks posed by WTE and alternative waste practices legislative initiatives and regulatory uncertainties and the potential for energy production from burning our municipal waste Municipal solid waste MSW incineration commonly called waste to energy WTE was adopted by many U S communities during the 1980s and now is used to manage about 16% of all U S MSW Many experts forecasted that WTE would be used to manage as much as half of all garbage by the turn of the century Those forecasts and the long run viability of WTE are now challenged by massive cancellations of WTE projects across the United States Between 1986 and 1990 207 WTE projects were abandoned compared to only 140 operational facilities in 1990 Why have these cancellations occurred and what do they tell us about the long run viability of WTE This book addresses these questions and presents the first comprehensive and unbiased assessment of the social and economic factors that drive decisions about WTE in the United States The book adopts a three pronged approach to investigate 1 the relationships between a community s decision about WTE and the social and economic characteristics of

that community 2 the impacts of recent changes in financial markets on the viability of WTE and 3 the decision making process by which communities decide about WTE The first two objectives are met by the collection and analysis of data on all U S WTE projects from 1982 to 1990 The latter objective is met by way of four in depth case studies two directed at communities that have accepted WTE and two that have canceled WTE projects The book also discusses the potential health and environmental risks posed by WTE and alternative waste practices legislative initiatives and regulatory uncertainties and the potential for energy production from burning our municipal waste
