Simmons,1990-12-31 To spite a national trend toward renovation restoration and remodeling construction products producers and their associations are not universally eager to publish recommendations for repairing or extending existing materials There are two major reasons First there are several possible applications of most building materials and there is an even larger number of different problems that can occur after products are installed in a building Thus it is difficult to produce recommendations that cover every eventuality Second it is not always in a building construction product producer s best interest to publish data that will help building owners repair their product Producers whose income derives from selling new products do not necessarily applaud when their associations spend their money telling architects and building owners how to avoid buying their products Finally in the Building Renovation and Restoration Series we have a reference that recognizes that problems frequently occur with materials used in building projects In this book and in the other books in this series xv xvi Series Foreword Simmons goes beyond the promotional hyperbole found in most product literature and explains how to identify common problems He then offers informed inside recommendations on how to deal with each of the problems Each chapter covers certain materials or family of materials in a way that can be
