

ALGEBRA 2 ~ CHAPTER 1 NOTES

1.1 PARENT FUNCTIONS AND TRANSFORMATIONS

1.1 Day 1

- I can identify the function family to which a function belongs.
- I can graph transformations of functions.
- I can explain how translations, reflections, stretches, and shifts affect graphs of functions.

EXPLORE IT

Identifying Basic Parent Functions

Work with a partner.

- a. Graphs of six basic parent functions are shown below. Classify each function by constant, linear, absolute value, quadratic, square root, or exponential. Justify your reasoning.

- b. Sort the parent functions in part (a) into groups. Explain how you grouped them.

- c. What are the characteristics of the graphs?

Tyranny of the Textbook Beverlee Jobrack, 2011-12-23 Educational reforms and standards have been a topic of public debate for decades with the latest go round being the State Common Core Curriculum Standards But time and again those reforms have failed and each set of standards no matter how new and different has had little impact on improving student achievement Why The textbooks Textbooks sell based on design and superficial features not because they are based on the latest research on how children learn and how well they promote student achievement In *Tyranny of the Textbook* Beverlee Jobrack retired from educational publishing sheds light on why this happens She gives an engaging and fascinating look behind the scenes of how K 12 textbooks are developed written adopted and sold And perhaps most importantly she clearly spells out how the system can change so that reforms and standards have a shot at finally being effective Did you know Reform efforts have focused on writing and rewriting standards and tests but these rarely have any effect on the core curriculum that is published School districts and states don't use effectiveness as a criterion for evaluating and purchasing textbooks Publishers don't offer textbooks with better content or the latest teaching methods because teachers don't want textbooks that require them to change their practices Teachers report that they don't rely on a textbook in their class but research shows that they do Three companies publish 75 percent of the K 12 educational materials Those three companies are producing similar programs with the same instructional strategies none of which require teachers to change their practices significantly Publishers write

Theories Of Probability: An Examination Of Logical And Qualitative Foundations Louis E Narens,2007-08-13 Standard probability theory has been an enormously successful contribution to modern science However from many perspectives it is too narrow as a general theory of uncertainty particularly for issues involving subjective uncertainty This first of its kind book is primarily based on qualitative approaches to probabilistic like uncertainty and includes qualitative theories for the standard theory as well as several of its generalizations One of these generalizations produces a belief function composed of two functions a probability function that measures the probabilistic strength of an uncertain event and another function that measures the amount of ambiguity or vagueness of the event Another unique approach of the book is to change the event space from a boolean algebra which is closely linked to classical propositional logic to a different event algebra that is closely linked to a well studied generalization of classical propositional logic known as intuitionistic logic Together these new qualitative theories succeed where the standard probability theory fails by accounting for a number of puzzling empirical findings in the psychology of human probability judgments and decision making

Mathematical Foundation Of Gis Wolfgang Kainz,Huayi Wu,2024-06-07 Geographic Information Systems GIS originated in the 1960s and have since become the primary tool and science for handling spatial data This unique compendium introduces essential mathematical knowledge related to GIS including mathematical logic geometry algebra topology set theory graph theory probability theory and statistics as well as uncertainty theory These topics cover GIS data modeling geometric calculations topological analysis spatial inference and are helpful in understanding how to express spatial feature models derive logical conclusions from given facts perform coordinate transformations and even aspects such as remote sensing image classification and machine learning

Models to Illustrate the Foundations of Mathematics C. Elliott,1914 Precalculus: A Functional Approach to Graphing and Problem Solving Karl Smith,2013 Precalculus A Functional Approach to Graphing and Problem Solving prepares students for the concepts and applications they will encounter in future calculus courses In far too many texts process is stressed over insight and understanding and students move on to calculus ill equipped to think conceptually about its essential ideas This text provides sound development of the important mathematical underpinnings of calculus stimulating problems and exercises and a well developed engaging pedagogy Students will leave with a clear understanding of what lies ahead in their future calculus courses Instructors will find that Smith s straightforward student friendly presentation provides exactly what they have been looking for in a text
