Betrayed:

Development Betrayed Richard B Norgaard,2006-05-18 Modernity promised control over nature through science material abundance through technology and effective government through rational social organization Instead of leading to this promised land it has brought us to the brink of environmental and cultural disaster Why has there been this gap between modernity s aspirations and its achievements *Development Betrayed* offers a powerful answer to this question Development with its unshakeable commitment to the idea of progress is rooted in modernism and has been betrayed by each of its major tenets Attempts to control nature have led to the brink of environmental catastrophe Western technologies have proved inappropriate for the needs of the South and governments are unable to respond effectively to the crises that have resulted Offering a thorough and lively critiques of the ideas behind development Richard Norgaard also offers an alternative co evolutionary paradigm in which development is portrayed as a co evolution between cultural and ecological systems Rather than a future with all peoples merging to one best way of knowing and doing things he envisions a future of a patchwork quilt of cultures with real possibilities for harmony
