Communication and Creativity in the Math Classroom Nicholas J. Rinaldi,2013-12-03 Whether you are a new or an experienced teacher Communication and Creativity in the Math Classroom provides you with classroom tested activities and ideas which are motivating engaging and meaningful to students Traditional textbooks commonly feature conventional un engaging and somewhat boring problems and activities Communication and Creativity in the Math Classroom provides you with activities and ideas which stress life skills such as communicating more effectively being creative analyzing a variety of problems following directions and working cooperatively with others These skills are very valuable but are rarely addressed in the traditional math curriculum The materials and ideas in this book allow you to interject these skills into your daily lessons while covering various mathematical topics Many of the easily reproducible activities can be used as assessments consequently suggested scoring rubrics are included as well as helpful strategies and observations **Networking of Theories as a Research Practice in Mathematics Education** Angelika Bikner-Ahsbabs,Susanne Prediger,2014-08-25

How can we deal with the diversity of theories in mathematics education This was the main question that led the authors of this book to found the Networking Theories Group Starting from the shared assumption that the existence of different theories is a resource for mathematics education research the authors have explored the possibilities of interactions between theories such as contrasting coordinating and locally integrating them The book explains and illustrates what it means to network theories it presents networking as a challenging but fruitful research practice and shows how the Group dealt with this challenge considering five theoretical approaches namely the approach of Action Production and Communication APC the Theory of Didactical Situations TDS the Anthropological Theory of the Didactic ATD the approach of Abstraction in Context AiC and the Theory of Interest Dense Situations IDS A synthetic presentation of each theory and their connections shows how the activity of networking generates questions at the theoretical methodological and practical levels and how the work on these questions leads to both theoretical and practical progress The core of the book consists of four new networking case studies which illustrate what exactly can be gained by this approach and what kind of difficulties might arise
