

# Process Approach to Writing

- The process approach to writing places emphasis on the different steps which compose the act of writing, and on the giving of feedback and space for that feedback to be integrated into the creative act.
- The teacher is not someone who simply sets a title and then stands back waiting for the final product which will then be delivered for correction; she or he scaffolds the creative process and helps students to co-create their writing, drawing on each other, their surroundings and their teaching.
- It is a mode which is much more in sympathy with social constructivist theories of learning than the earlier model of simple correction of the finished product.
- It corresponds much more closely with the theory of assessment for learning rather than of learning. Feedback which is given mid-writing, whether between drafts or mid-sentence, is much more useful than feedback given at the end. Students can act on advice on the spot. Feedback given on completed pieces of work, in the form of summative comments, will not have any impact on that piece of work, and is unlikely to do much to improve future pieces of work without specific activities to ensure that it does.
- White and Arntsd (1991) suggest that in addition, focusing on language errors 'improves neither grammatical accuracy nor writing fluency': instead, they say, paying attention to what students say during the process, and interacting with it, will lead to an improvement in their writing.
- The emphasis on the process is also designed to enable students to realise that what they have put on paper is not unchangeable. It is an important part of developing as a writer to understand that things can be deleted or added, restructured and redrafted.
