INFORMASI MEDIKA Metodología docente y rendimiento en PISA 2015: Análisis crítico = Teaching methodology and performance in PISA 2015: Critical analysis Álvarez Moran, Sara,Carleos Artime, Carlos E.,Corral Blanco, Norberto, La controversia entre quienes defienden que la enseñanza de las ciencias debe hacerse empleando una metodología dirigida por el docente y aquellos que se alan que es preferible que sea centrada en el estudiante lleva d cada siendo objeto de estudio En la edición de PISA de 2015 se destaca que la enseñanza dirigida por el profesor en Ciencias ndice TDTEACH es una de las variables que mayor relación tiene con los resultados en las pruebas de Ciencias En este estudio se examina la muestra PISA que representa a España para tratar de determinar en qué medida ese resultado puede estar condicionado por otros factores Se constata que el TDTEACH tiene tanta relación con el rendimiento de los estudiantes en Ciencias como con su rendimiento en Matemáticas y Lectura resultando sorprendente que la forma de enseñar en las clases de ciencias tenga incidencia en los resultados del resto de competencias evaluadas en PISA También se aprecia que la variabilidad intra centros del TDTEACH es mucho más importante que la variabilidad entre centros lo cual resulta bastante chocante pues a priori las metodologías de trabajo son consensuadas dentro de una misma escuela También se comprueba que al representar cada centro por sus valores medios la influencia del TDTEACH en el rendimiento desaparece al considerar

el efecto del nivel socio educativo lo que indicar a que no hay relación entre el TDTEACH y las puntuaciones de los estudiantes Por ltimo se encuentra una correlación positiva entre TDTEACH y la enseñanza basada en la investigación IBTEACH Todos estos resultados inducen a pensar que 1 el índice TDTEACH no mide de manera adecuada la enseñanza dirigida por el profesor en ciencias 2 no está justificado suponer que la enseñanza dirigida por el docente produzca mejores resultados de los estudiantes en el sistema educativo español

Minority Language Planning and Micronationalism in Italy Paolo Coluzzi,2007 Issues of language planning and minority nationalism or micronationalism are becoming increasingly important in a globalized world Yet minority language planning in Italy and its relation to minority nationalism has so far attracted relatively limited academic attention despite the particularly interesting changes that have taken place since Law 482 on the protection of minority languages was passed in 1999 This book presents the situation in Italy in three case studies and compares them with similar cases in Spain Friulian compared with Galician Cimbrian compared with Aranese and Western Lombard compared with Asturian Analysis of these case studies is preceded by a clear and thorough introduction to terminology legislation in the two countries nationalism the discipline of language planning and bilingual education both in general terms and with specific reference to the Italian and Spanish cases This first part introduces and defines the crucial distinction between minority and regional languages between macro and micronationalism both in their conservative and progressive strands and between majority and minority language planning among other things
