Your Knee Off Our Necks Bruce E. Johansen, Adebowale Akande, 2022-01-04 The death of George Floyd on May 25 2020 and the ensuing trial of Derek Chauvin for murder a year later has rubbed raw the bloodiest stain on the United States history and its world reputation The nine minutes and 29 seconds during which Chauvin s knee crushed the spark of life out of Floyd was not unusual in the history of the United States Before the U S Civil War slaves were routinely beaten to death for disobeying orders or running away then often lynched In roughly two centuries Blacks have achieved nominal freedom But as this book s opening chapter and expert essays that follow indicate freedom has been conditional based on inequity of wealth social and legal discrimination None of this is new in the United States what is new is the number of people rising up

in protest a figure in the millions around the world after Floyd's murder. This book supplies a readable scholarly account of recent issues in race and racism in the United States that will be useful for general readers, undergraduate students and their professors. It will be useful in many fields including Black studies, other ethnic pursuits, United States history, law, criminal justice, intercultural communication, et al. The work contains a powerful historical narrative followed by several important essays on subjects including George Floyd's murder, the rise of the Black Lives Matter movement and many other victims of systematic racism.

End Times Peter Turchin, 2023-06-13 Peter Turchin brings science to history. Some like it and some prefer their history plain. But everyone needs to pay attention to the well-informed, convincing and terrifying analysis in this book. Angus Deaton, winner of the Nobel Prize in Economics. From the pioneering co-founder of cliodynamics, the groundbreaking new interdisciplinary science of history, a big picture explanation for America's civil strife and its possible endgames. Peter Turchin, one of the most interesting social scientists of our age, has infused the study of history with approaches and insights from other fields for more than a quarter century. End Times is the culmination of his work to understand what causes political communities to cohere and what causes them to fall apart as applied to the current turmoil within the United States. Back in 2010 when *Nature* magazine asked leading scientists to provide a ten-year forecast, Turchin used his models to predict that America was in a spiral of social disintegration that would lead to a breakdown in the political order circa 2020. The years since have proved his prediction more and more accurate, and End Times reveals why. The lessons of world history are clear. Turchin argues: When the equilibrium between ruling elites and the majority tips too far in favor of elites, political instability is all but inevitable. As income inequality surges and prosperity flows disproportionately into the hands of the elites, the common people suffer, and society-wide efforts to become an elite grow ever more frenzied. He calls this process the wealth pump: it's a world of the damned and the saved. And since the number of such positions remains relatively fixed, the overproduction of elites inevitably leads to frustrated elite aspirants who harness popular resentment to turn against the established order. Turchin's models show that when this state has been reached, societies become locked in a death spiral; it's very hard to exit. In America, the wealth pump has been operating full blast for two generations. As cliodynamics shows us, our current cycle of elite overproduction and popular immiseration is far along the path to violent political rupture. That is only one possible end time, and the choice is up to us, but the hour grows late. **Ready or Knot?**
