Blueprint for Survival Edward Goldsmith,1972      **A Blueprint for Survival** ,1972      **A Blueprint for Survival**  
Edward Goldsmith,1972      Blueprint for Survival Ecologist,Edward Goldsmith,1974-04-01      **A Blueprint for Survival,**  
**by the Editors of The Ecologist** ,1972      *Blueprint for Survival* William Morse,1957      Blueprint for Survival Canada.  
Department of Agriculture,1967      **A Blueprint for Survival** Melford Pearson,2002 The main thrust of A Blueprint for  
Survival is to offer proposals for the solution of the most serious problems both economic and political that burden the nation  
It recognizes the fact that comprehensive economic justice and peace can only be achieved by the restructuring of the  
economic and political systems themselves The first part of the book is devoted to presenting the inherent flaws in the nation  
s private capitalist system Without understanding how the economic and political systems are wrongly structured resulting in  
the nation s most egregious problems millions suffering unmet needs there cannot be a full understanding of the proposals  
for a National Cooperative Commonwealth that is proposed in the second part of the book The four major flaws in our  
economic political systems are dealt with Absence of any restraints on the growth of unnatural entities called corporations  
Since the inception of our nation they have progressively taken over the nation s productive capability until today through  
accelerated mergers they are oppressively dominant in every area of the nation s products services and all levels government  
Unconstitutional control of the nation s money and credit by private financial entities Such control has led to the  
astronomical debt of trillions of dollars with the private citizens and their government in perpetual bondage to non producers  
Most seriously they have had the power to place liens against the workers future earnings as the only means by which they  
could purchase what they in the accumulate had already produced Those who control the economic an financial systems  
control the political processes by which government operates First they have gotten control of the nation s issuance of money  
and credit then corralled all of its industrial assets and technology and finally through these interlocking monopolies  
underwritten all major candidates who will be beholden to act according to the wishes and dictates of their underwriters  
Inability of the social economic financial system to constructively accommodate the advancements in science and technology  
It has been a two edged sword with strides made in many fields of human endeavor but at the same time it has created  
threats to life itself The most potent indictment against the private capitalist system is that there have existed serious unmet  
needs while at the same time there has been unused technological capability to fulfill those needs The nation has reached a  
critical mass in the functioning of its economic social and political patterns The primary purpose of the book is to enlighten  
the people as to the inevitable breakdown of adversary systems like private capitalism and the need to embrace cooperative  
teamwork systems The secondary purpose and most defining in terms of hope and the future is to present the legal steps that  
can be taken within the framework of the Constitution leading to the adoption of a National Cooperative Commonwealth  
Employing the principle of incorporation a National Cooperative Commonwealth is simply incorporating the entire productive

capability of the nation its natural resources its productive machinery its human skill and its technology into a Grand Corporation in which every citizen is a common shareholder and a preferred shareholder giving each citizen a decision making voice and also giving each a purchasing claim against the total goods and services produced It is a Commonwealth in which the people democratically coordinate the full productive capability of the nation so that it can be unleashed for an abundant equitable and creative life for all It is a Commonwealth in which the nation s work capability would be automatically unleashed in direct ratio to the determined needs and services of the total citizenry devoid of all the stultifying burdens of indebt
