Rationality and Cultural Interpretivism Kei Yoshida, 2014-08-06 Rationality and Cultural Interpretivism A Critical Assessment of Failed Solutions critically assesses cultural interpretivism by scrutinizing five different proponents of it and their solutions to the problem of rationality The book examines the works of Peter Winch Charles Taylor Clifford Geertz Marshall Sahlins and Gananath Obeyesekere and their contributions to the so called rationality debate in the philosophy of the social sciences This debate began with Winch s criticism of Edward Evans Pritchard and has become one of the central debates in the field since 1960s continuing as a controversy between Sahlins and Obeyesekere Kei Yoshida reveals the need for a cogent solution to the problem of rationality He identifies two main problems with previous theories first that they exaggerate the differences between the natural and the social cultural and hence they also exaggerate the differences between the natural and the social sciences and second that they ignore important social science problems particularly outcomes from the unintended consequences of human actions Yoshida urges social scientists not simply to interpret agents

intentions or symbolic systems but also to explain the unintended consequences of human actions Still entangled in positivism cultural interpretivists claim that the social sciences differ from the natural sciences and thus reject any unity of method Yoshida argues that we need to overcome the mistaken positivist image of science in order to develop a more fruitful philosophy of the social sciences The analysis presented in this book will be of value to students and scholars of social epistemology philosophy of science philosophy of the social sciences and the social sciences themselves as well as anyone interested in the philosophical problem of rationality and relativism

Sartre and Psychoanalysis Betty Cannon, 1991 Betty Cannon is the first to explore the implications of Sartrean philosophy for the Freudian psychoanalytic tradition Drawing upon Sartre's work as well as her own experiences as a practicing therapist she shows that Sartre was a fellow traveler who appreciated Freud's psychoanalytic achievements but rebelled against the determinism of his metatheory The mind Sartre argued cannot be reduced to a collection of drives and structures nor is it enslaved to its past as Freud's work suggested Sartre advocated an existentialist psychoanalysis based on human freedom and the self's ability to reshape its own meaning and value Through the Sartrean approach Cannon offers a resolution to the crisis in psychoanalytic metatheory created by the current emphasis on relational needs By comparing Sartre with Freud and influential post-Freudians like Melanie Klein Otto Kernber Margaret Mahler D W Winnicott Heinz Kohut Harry Stack Sullivan and Jacques Lacan she demonstrates why the Sartrean model transcends the limitations of traditional Freudian metatheory In the process she adds a new dimension to our understanding of Sartre and his place in twentieth century philosophy
