Critical Caribbean Perspectives on Preventing Gender-Based Violence Ramona Biholar, Dacia L. Leslie, 2022-06-01 This book explores the widespread problem of gender based violence in the Anglophone Caribbean exploring reasons for its perpetuation and proposing viable policy and programming solutions to prevent it Drawing on the work of a multidisciplinary team of Caribbean researchers and practitioners the book explores the ways in which violence victimisation and perpetration have been socially and institutionally shaped and supported by fixed gender codes Key themes in the book include the institutional frameworks and structural inequalities that perpetuate gender based violence the role of the church both in perpetuating the problem and its potential to combat it the role of law access to justice and governmental and non governmental responses to gender based violence The book covers violence against women but also explores women as perpetrators men and boys as victims and gender based violence against young persons It also demonstrates the ways in which gender based violence can further marginalise already marginalised groups such as members of the LBTQ community or persons with disabilities Bridging the divide between academia government and civil society this book challenges the normalisation of gender based violence in the Anglophone Caribbean and proposes viable

culturally relevant solutions for prevention It will be of interest to researchers and practitioners working on issues related to gender the Caribbean global development criminology and human rights **Gender-based Violence and HIV/AIDS in South Africa** Ulrike Kistner, Centre for AIDS Development, Research and Evaluation, 2003 Reconsidering the Democratic Public George E. Marcus, Russell L. Hanson, 1993 This book offers a re examination of the evidence about citizens capacity for self governance and what it means for the future of democratic politics from both empirical and normative perspectives Are ordinary citizens capable of governing themselves For more than three decades social scientists have accumulated evidence of the undemocratic propensities of many ordinary citizens This has caused some to worry about the stability of existing democratic institutions while others argue that the institutions themselves are the problem politics needs to be democratized further giving citizens more opportunities to practice democratic politics and acquire democratic values The thirty three contributors to this volume enter this debate with new evidence on citizens capacity for deliberative politics They argue that previous methods of investigation significantly underestimate people s ability to govern themselves and that the prospects for democracy are better than conventional wisdom suggests Realization of these prospects will depend on citizens grasping the interplay of emotions and reason in political life creating new opportunities for citizen deliberation and reinvigorating the institutions of representative government Theories of democracy in turn will have to accommodate this changing reality as citizens show themselves to be self determining in their political activities Journal of Peace Research , 2007-03
