

1 Reliability Evaluation of Engineering Systems:

The concept of Reliability Evaluation of Engineering Systems refers to the assessment of the ability of engineering systems to perform their intended functions under stated conditions for a specified period of time. It involves analyzing the probability of a system or component operating without failure for a given duration. Reliability evaluation is crucial in ensuring the safety, performance, and cost-effectiveness of engineering systems.

2 Reliability Logic Diagram (RLD):

Reliability Logic Diagram (RLD) or Reliability Block Diagram (RBD) is a graphical representation used to illustrate the reliability of complex systems. It shows the interconnections of components and their reliability relationships. For example, in a simple RBD, components are represented as blocks, and their interconnections show how failures in one component can affect the overall system reliability.
