Kinetics in Materials Science and Engineering Dennis W. Readey, 2017-01-27 A pedagogical gem Professor Readey replaces black box explanations with detailed insightful derivations A wealth of practical application examples and exercise problems complement the exhaustive coverage of kinetics for all material classes Prof Rainer Hebert University of Connecticut Prof Readey gives a grand tour of the kinetics of materials suitable for experimentalists and modellers In an easy to read and entertaining style this book leads the reader to fundamental model based understanding of kinetic processes critical to development fabrication and application of commercially important soft polymers biomaterials hard ceramics metals and composite materials It is a must have for anyone who really wants to understand how to make materials and how they will behave in service Prof Bill Lee Imperial College London Fellow of the Royal Academy of Engineering A much needed text filling the gap between an introductory course in materials science and advanced materials specific kinetics courses Ideal for the undergraduate interested in an in depth study of kinetics in materials Prof Mark E Eberhart Colorado School of Mines This book provides an in depth introduction to the most important kinetic concepts in materials science engineering and processing All types of materials are addressed including metals ceramics polymers electronic materials biomaterials and composites The expert author with decades of teaching and practical experience gives a lively and accessible overview explaining the principles that determine how long it takes to change material properties and make new and better materials The chapters cover a broad range of topics extending from the heat treatment of steels the processing of silicon integrated microchips and the production of cement to the movement of drugs through the human body The author explicitly avoids black box equations providing derivations with clear explanations

Nanotechnology Louis Theodore, 2006-01-03 A practical workbook that

bridges the gap between theory and practice in the nanotechnology field. Because nanosized particles possess unique properties, nanotechnology is rapidly becoming a major interest in engineering and science. *Nanotechnology: Basic Calculations for Engineers and Scientists* is a logical follow-up to the author's previous text, *Nanotechnology: Environmental Implications and Solutions*, presenting a practical overview of nanotechnology in a unique workbook format. The author has developed nearly 300 problems that provide a clear understanding of this growing field in four distinct areas of study: Chemistry fundamentals and principles, Particle technology Applications, Environmental concerns, and These problems have been carefully chosen to address the most important basic concepts, issues, and applications within each area, including such topics as patent evaluation, toxicology, particle dynamics, ventilation, risk assessment, and manufacturing. An introduction to quantum mechanics is also included in the Appendix. These stand-alone problems follow an orderly and logical progression designed to develop the reader's technical understanding. This is certain to become the pacesetter in the field, a text to benefit both students of all technical disciplines and practicing engineers and researchers.

Dr. Howard Beim, Professor of Chemistry, U.S. Merchant Marine Academy, has covered most of the important nanotechnology subject matter in this work through simple, easy-to-follow problems.

John McKenna, President and CEO, ETS Inc., *Membrane Based Methods for Dye Containing Wastewater*, Subramanian, Senthilkannan Muthu, Ali Khadir, 2021-10-13. This book highlights recent findings of membrane-based dye removal methods along with the application of photocatalytic nanofiltration and ultrafiltration membrane, including membrane-based fibers, metal-organic frameworks, polyethersulfone, ceramic, etc. Among water and wastewater pollutants, dyes have been normally observed and detected in various aquatic solutions, including rivers and lakes. Aesthetic pollution, toxicity, persistent, and carcinogenicity are some of the adverse effects of dyes entering the ecosystem. Although dyes have brought a colorful world, their presence in the environment is responsible for adverse effects on the planet. Diverse physical, chemical, and biological methods are available to treat dye-contaminated water. This book presents membrane separation technology that has been developed in the past decade to treat different wastewaters, and owing to its effective performance, has garnered the attention of academia and industry alike.

Engineering of Materials Donald R. Askeland, Frank Haddleton, Phil Green, Howard Robertson, 2013-11-11 The Science and Engineering of Materials Third Edition continues the general theme of the earlier editions in providing an understanding of the relationship between structure processing and properties of materials This text is intended for use by students of engineering rather than materials at first degree level who have completed prerequisites in chemistry physics and mathematics The author assumes these students will have had little or no exposure to engineering sciences such as statics dynamics and mechanics The material presented here admittedly cannot and should not be covered in a one semester course By selecting the appropriate topics however the instructor can emphasise metals provide a general overview of materials concentrate on mechanical behaviour or focus on physical properties Additionally the text provides the student with a useful reference for accompanying courses in manufacturing design or materials selection In an introductory survey text such as this complex and comprehensive design problems cannot be realistically introduced because materials design and selection rely on many factors that come later in the student's curriculum To introduce the student to elements of design however more than 100 examples dealing with materials selection and design considerations are included in this edition **The Publishers' Trade List Annual** ,1985 Choice ,2007
