

## CONSOLIDATION TECHNIQUES AND PROCEDURES

## Answers to Questions

- Under the equity method, a parent amortizes patents from subsidiary investments by adjusting its subsidiary investment and income accounts. Since patents and patent amortization accounts are not recorded on the parent's books, they are created for consolidated statement purposes through workpaper entries.
- Noncontrolling interest share is entered in the consolidation workpapers by preparing a workpaper adjusting entry in which noncontrolling interest share is debited and noncontrolling interest is credited. The noncontrolling interest share (debit) is carried to the consolidated income statement as a deduction, and the credit to noncontrolling interest for noncontrolling interest share is added to the beginning noncontrolling interest. The noncontrolling interest share is calculated based on the subsidiary's reported net income adjusted to reflect fair value through the amortization of the excess of fair value over book value. This is the approach illustrated throughout this text.
- Workpaper procedures for the investment in subsidiary, income from subsidiary, and subsidiary equity accounts are alike in regard to the objectives of consolidation. Regardless of the configuration of the workpaper entries, the final result of adjustments for these items is to eliminate them through workpaper entries. In other words, the investment in subsidiary, income from subsidiary, and the capital stock, additional paid-in capital, retained earnings, and other stockholders' equity accounts of the subsidiary never appear in consolidated financial statements.
- When the parent does not amortize fair value/book value differentials on its separate books, the parent's income from subsidiary and investment in subsidiary accounts are overstated in the year of acquisition. In subsequent years, the income from the subsidiary, investment in subsidiary, and parent's beginning retained earnings will be overstated. The error may be corrected in the workpapers with the following entries:

*Year of acquisition*

Income from subsidiary	XXX	
Investment in subsidiary		XXX

*Subsequent year*

Income from subsidiary	XXX	
Retained earnings — parent	XXX	
Investment in subsidiary		XXX

By entering a correcting entry, all other workpaper entries are the same as if the parent provided for amortization on its separate books.

If the errors are not corrected through the workpaper entries suggested above, the entry to eliminate the income from subsidiary in the year of acquisition is prepared in the usual manner without further complications because neither the beginning investment nor retained earnings accounts are affected by the omission. In subsequent years the entry to eliminate income from subsidiary and dividends from subsidiary will have to be changed to correct the beginning-of-the-period retained earnings as follows.

Income from subsidiary	XXX	
Retained earnings — parent	XXX	
Dividends (subsidiary)		XXX
Investment in subsidiary		XXX
