THE Journal ,1996 *Ethics and Robotics* Rafael Capurro,Michael Nagenborg,2009 Ethics and robotics are two
academic disciplines one dealing with the moral norms and values underlying implicitly or explicitly human behavior and the
other aiming at the production of artificial agents mostly as physical devices with some degree of autonomy based on rules
and programmes set up by their creators Robotics is also one of the research fields where the convergence of
nanotechnology biotechnology information technology and cognitive science is currently taking place with large societal and
legal implications beyond traditional industrial applications Robots are and will remain in the foreseeable future dependent
on human ethical scrutiny as well as on the moral and legal responsibility of humans Human robot interaction raises serious
ethical questions right now that are theoretically less ambitious but practically more important than the possibility of the
creation of moral machines that would be more than machines with an ethical code The ethical perspective addressed in this
volume is therefore the one we humans have when interacting with robots Topics include the ethical challenges of healthcare
and warfare applications of robotics as well as fundamental questions concerning the moral dimension of human robot
