

## Gradient concept

In addition to color swatches, you can use the ability to apply various gradients to objects.

1 With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Linear** to apply a default gradient. Drag across your object to create a custom path for the gradient.

2 Drag across the artwork to change the length and direction of the gradient path, and drag the midpoint marker to change the midpoint of the gradient between the current colors.

3 Rotate the handle along the path to create a blue-to-purple gradient, which can then be moved along the gradient path.

With the circle selected, click the **Tools Panel** button on the toolbar, set the **Type** to **Radial** to apply a default gradient. Drag across your object to create a custom path for the gradient.

An alternative to an address to working with gradients directly on the object, there is a **Gradients** editor available from the **Color** panel on the toolbar. This **Gradients** editor gives you high precision drag positioning as well as a few additional options.

You can work with **Elliptical** and **Radial** gradients in either **Linear** or **Radial** orientation. To create a custom **Linear** gradient, use the **Type** pop-up menu on the **Gradients** panel. Drag across the object to create a custom path for the gradient. You can also use the **Gradients** panel to create a **Radial** gradient.
