The book also contains a selective discussion of invasive procedures that the coder will most likely encounter on the job and on the exam. At the end of ICD 9 CM Inpatient Coding Reference and Study Guide are 15 case studies providing the reader with an opportunity to assess their ICD 9 CM coding skill set and speed at coding inpatient medical records. Each record contains a face sheet, history, physical, progress notes, and answer sheet. Some of the case studies contain ER reports, consultations, as well as operative and pathology reports. The answer key at the end of this study guide contains a rationale for all code assignments, 456 short answer questions, 116 multiple choice questions, 15 full medical record case studies. Each question is highly relevant and reflects a coding situation most hospital based inpatient coders will face. The text strives to ensure the reader understands every diagnosis and procedure discussed through discussion of symptoms, standard treatment protocols, and medications.
