Holistic Admissions as a Global Phenomenon Michael N. Bastedo, 2025-11-27 This edited book brings together leading scholars to share ongoing research on the diffusion of holistic admissions practices around the world. Many countries have adopted holistic admissions practices and some have used them for incoming students for over two decades but these developments have been rarely noted in policy and media discussions about university admissions. Chapters in this volume explore the similar challenges global institutions face related to college access, admissions transparency, and the potential for corruption, and how their admissions practices affect equity, access, and student diversity. Translating a body of existing transnational research, this volume provides strategies that higher education scholars, policymakers, and practitioners can use to improve admissions practices and policies in global contexts.

AAAI-92, 1992 AAAI proceedings describe innovative concepts, techniques, perspectives, and observations that present promising research directions in artificial intelligence. The focus of the AAAI 92 conference is on the re-integration of AI as a diverse but coherent whole. Accordingly, the traditional list of community-based content areas has been replaced by a more neutral set of taxonomies that span the field. For example, a paper proposing a new epistemology for representing the physical world based on an analysis of human brain structure would be described as representation, physical world, biological. The papers collected here represent significant research contributions to such areas as the principles underlying cognition, perception, and action in man and machine; the design, application, and evaluation of AI algorithms and systems; and the analysis of domains in which AI systems perform.
