Smart Villages Robert Krueger, Hermine Vedogbeton, Mustapha Fofana, Wole Soboyejo, 2023-12-18 This book asserts that the goal of smart villages should shift from one of extraction to one of community value creation To begin this conversation we examine the smart village discourse debates in design theory non western traditions of innovation and sustainable development Through case studies of smart village co design we offer a way forward This book is relevant for engineers social scientists and development practitioners The book will be of special interest to those seeking to expand their inquiry into the role of science and technology in low and middle income countries

Artificial Intelligence and Industrial Applications Tawfik Masrour, Ibtissam El Hassani, Anass Cherrafi, 2020-07-18 This book gathers selected papers from Artificial Intelligence and Industrial Applications A2IA 2020 the first installment of an annual international conference organized by ENSAM Meknes at Moulay Ismail University Morocco The 29 papers presented here were carefully reviewed and selected from 141 submissions by an international scientific committee They address various aspects of artificial intelligence such as digital twin multiagent systems deep learning image processing and analysis control prediction modeling optimization and design as well as AI applications in industry health energy agriculture and education The book is intended for AI experts offering them a valuable overview and global outlook for the future and highlights a wealth of innovative ideas and recent important advances in AI applications both of a foundational and practical nature It will also appeal to non experts who are curious about this timely and important subject

Stirling Engine Project Austin Eilering, Ortega. Roland, Douglas Yanagihara, 2020 For this year s Senior Project Design we will be inheriting last year s Alpha Stirling Engine with the intention of improving upon the design to have a functional prototype With that this will incorporate several design changes and different testing methods From those changes this will provide us with a baseline as far as the validity of analysis for this design With further analysis of last year s engine we noticed that it was faulty due to wrong assumptions and modelling Last year s design team modelled the engine as a single piston single cylinder engine With the two pre existing piston cylinders on their past design we believe it wasn t appropriate for their design choice This year we will pursue a different design provided by a text written by James R Senft This text will provide us with engineering drawings for a complete assembly on this type of air engine Our main objective this year is to focus less on the dynamic analysis of Stirling Engines but more on the potential applications it can be used in This report will contain our iterative process of our final design and a brief analysis on the importance of scaling these engines in size
