Data Feminism Catherine D'Ignazio,Lauren F. Klein,2020-03-17 A new way of thinking about data science and data ethics that is informed by the ideas of intersectional feminism Today data science is a form of power It has been used to expose injustice improve health outcomes and topple governments But it has also been used to discriminate police and surveil This potential for good on the one hand and harm on the other makes it essential to ask Data science by whom Data science for whom Data science with whose interests in mind The narratives around big data and data science are overwhelmingly white male and techno heroic In *Data Feminism* Catherine D Ignazio and Lauren Klein present a new way of thinking about data science and data ethics one that is informed by intersectional feminist thought Illustrating data feminism in action D Ignazio and Klein show how challenges to the male female binary can help challenge other hierarchical and empirically wrong classification systems They explain how for example an understanding of emotion can expand our ideas about effective data visualization and how the concept of invisible labor can expose the significant human efforts required by our automated systems And they show why the data never ever speak for themselves *Data Feminism* offers strategies for data scientists seeking to learn how feminism can help them work toward justice and for feminists who want to focus their efforts on the growing field of data science But *Data Feminism* is about much more than gender It is about power about who has it and who doesn t and about how those differentials of power can be challenged and changed
