Oh Omnivore! The Path Of An Eclectic Theoretical Biologist Richard Gordon, 2025-04-02 Richard Gordon is a theoretical biologist who has led a multifaceted career with research spanning various fields and being a professor in departments as varied as Radiology and Botany His eclectic scientific pursuits and prolific writing have resulted in over 200 peer reviewed publications as well as many edited books and special issues This is his personal memoir It is based on a review of all his publications from Gordon s early years to the present He recounts the collaborations most importantly including the development of the nonlinear Algebraic Reconstruction Technique for image reconstruction his most cited work The ART algorithm today forms the basis of technologies that have dramatically improved progress from both basic science and in medicine such as computed tomography to 3D imaging of the sun s corona from satellites launched around the sun The memoir offers a unique blend of scientific storytelling personal reflection and humanitarian endeavor providing a fascinating glimpse into the life and work of a theoretical biologist with a remarkable range of interests and accomplishments The overarching theme is how does one survive as a generalist in an academic world of specialists The key seems to have been to have many collaborators both in and outside the academic world and diverse grant sources The result has been an enjoyable and highly productive career exploring many aspects of the world from amusing games to profound scientific and philosophical questions to potentially significant contributions to humanity By following his interests Gordon shows it is still possible to be a polymath in a fractionated world Along the way the author suggests many outstanding problems he s encountered that readers may want to tackle themselves

Wiki Anja Ebersbach, Markus Glaser, Richard Heigl, 2005-12-11 A book about wikis That s what people need Because with wiki technology lots of people can freely work gether they can even generate very large works in the intellectual realm See for yourself Today we still marvel at our massive church buildings each c structed over a period of centuries requiring an immense amount of labor and often bearing the cultural stamp of all of the epochs during which it was created Someone just has to begin by placing stone upon stone and motivate the people nearby to help out a bit In places where such enthusiastic fellow men and women lend a hand and donate materials great things can emerge And where they are absent Either scant ruins remain or the iron will of a pharaoh is quired an army of drivers the sweat of a people and a mountain of gold Great things can also be created in that way take the Py mids a clear concept no blending of styles pure will Those are two very different paths The one entails passionate people devotedly building something together for the common good the other a single will manages a variety of resources to achieve a set goal Wikis are tools with which lots of people with a minimum of ganization planning money and time can create something together and communicate with each other from several scattered computers or over the Internet
