New Directions in MIS Management Robert J. Thierauf,1988-11-15 Thierauf s work develops a number of interesting and potentially useful approaches to management information systems MIS practice The author presents a number of techniques some well known others more recent that practicing MIS managers may adopt to facilitate effective MIS planning for the 1990 s by focusing on problem finding rather than on problem solving A primary recommendation of Thierauf s is the restructuring of the MIS organization using a functional end user departmental approach Discussed at length are various issues relevant to this restructuring such as staffing motivating MIS personnel and end users and MIS soft controls Recommended for upper level undergraduate and graduate students as well as practicing managers and MIS specialists Choice With new developments in hardware and software MIS managers are increasingly faced with the need to develop more sophisticated managerial as opposed to purely technical skills Here an acknowledged expert in the field of information systems draws on his own original research and experience to develop a set of workable strategies and techniques that MIS managers can use to function more effectively as we move into the next decade Thierauf identifies probable trends in the field in coming years and outlines ways in which MIS managers can anticipate predictable problems apply improved management skills to the end user interface and effectively motivate MIS personnel Thierauf concentrates particularly on four major areas of managerial responsibility planning organizing motivating and controlling In planning he shows how to use problem finding techniques to anticipate and solve potential problems between MIS personnel and end users To help reduce this conflict Thierauf argues there is a need for a new direction in organizing MIS departments He proposes bringing MIS and end use departments together by using a functional departmental approach In motivating MIS personnel there is need to go beyond self actualization by emphasizing mutual actualization as well as self donation Finally in the area of control Thierauf advocates the use of soft controls to replace stringent controls that have had a tendency to restrict personal freedom on the job A common thread throughtout the discussion is a focus on effective guidelines for the MIS manager to follow in order to come to grips with the changing realities of the 1990s
