The Development Of Children 7th Edition:

The Development of Children Sheila R. Cole, Michael Cole, Cynthia Lightfoot, 2012-10-04 This popular textbook has long been acclaimed for its authoritative chronological exploration of how the lives of children are shaped by biological and cultural factors. Lead author Cynthia Lightfoot builds on the legacy of original authors Michael and Sheila Cole offering a lively engaging and always accessible examination of child development as a process involving the whole child within multiple mutually influencing contexts. Throughout the emphasis is on how the interaction of biology and culture contributes both to the universal pathways of development shared by all children and to the diverse developmental patterns that unfold in the lives of individual children. This is an accessible introduction to Developmental Psychology for students taking courses that focus on child and adolescent development.

The Development of Children's Thinking Jeremy Carpendale, Charlie Lewis, Ulrich Muller, 2017-11-27 The Development of Children's Thinking offers undergraduate and graduate students in psychology and other disciplines an introduction to several core areas of developmental psychology. It examines recent empirical research within the context of longstanding theoretical debates. In particular it shows how a grasp of classic theories within developmental psychology is vital for a grasp of new areas of research such as cognitive neuroscience that have impacted on our understanding of how children develop. The focus of this book will be on infancy and childhood and it looks at theories and context of development. How developmental psychology attempts to reconcile influences of nature and nurture. Communication in infancy as a precursor to later thinking. Language development in primates and young children. Cognitive and social development including the child's understanding of the mind. How studies of moral reasoning reflect upon our understanding of development.

The Development of Children Michael Cole, Sheila R. Cole, Cynthia Lightfoot, 2005 Development is best understood as a fusion of biological, social and psychological processes interacting in the unique medium of human culture. In this text the authors have tried to show not only the role of each of these factors considered separately but also how they interact in diverse cultural contexts to create whole, unique human beings.
