**THE PRINCIPLES OF SCIENTIFIC MANAGEMENT** FREDERICK WINSLOW TAYLOR, 1911      **The Principles of Scientific Management** Frederick Winslow Taylor, 2010-01-01 It seems at first glance for an obvious step to improve industrial productivity one should simply watch workers at work in order to learn how they actually do their jobs However this highly influential book a must read for anyone seeking to understand modern management practices puts lie to such misconceptions It disproves that making industrial processes more efficient increases unemployment and that shorter workdays decrease productivity And it lays the foundations for the discipline of management to be studied taught and applied with methodical precision American engineer FREDERICK WINSLOW TAYLOR 1856 1915 broke new ground with this 1919 essay in which he applied the rigors of scientific observation to such labor as shoveling and bricklayer in order to streamline their work and bring a sense of logic and practicality to the management of that work      **Five Hundred Business Books** American Library Association. Kelville Davis, 1913 **American Machinist**, 1911 *Knowledge, Space, Economy* John Bryson, Peter Daniels, Nick Henry, Jane Pollard, 2002-01-04. We are now living through a period of knowledge capitalism in which, as Castells put it, the action of knowledge upon knowledge is the main source of productivity. In the face of such transformation, the economic, social, and institutional contours of contemporary capitalism are being reshaped. At the heart of this world are an emergent set of economies, regions, institutions, and peoples central to the flows and translations of knowledge. This book provides an interdisciplinary review of the triad of knowledge, space, and economy on entering the twenty-first century. Drawing on a variety of disciplinary backgrounds, the first part of the book comprises a set of statements by leading authors on the role of knowledge in capitalism. Thereafter, the remaining two parts of the book explore the landscape of knowledge capitalism through a series of analyses of knowledge in action within a range of economic, political, and cultural contexts. Bringing together a set of authors from across the social sciences, this book provides both a major theoretical statement on understanding the economic world and an empirical exemplification of the power of knowledge in shaping the spaces and places of today's society. **Outlook** Alfred Emanuel Smith, Francis Walton, 1914 **Bulletin (1901-195)** Brooklyn Public Library, 1910 **Mining and Metallurgy**, 1925.
