*Learning with Kernels* Bernhard Scholkopf, Alexander J. Smola, 2018-06-05 A comprehensive introduction to Support Vector Machines and related kernel methods In the 1990s a new type of learning algorithm was developed based on results from statistical learning theory the Support Vector Machine SVM This gave rise to a new class of theoretically elegant learning machines that use a central concept of SVMs kernels for a number of learning tasks Kernel machines provide a modular framework that can be adapted to different tasks and domains by the choice of the kernel function and the base algorithm They are replacing neural networks in a variety of fields including engineering information retrieval and bioinformatics Learning with Kernels provides an introduction to SVMs and related kernel methods Although the book begins with the basics it also includes the latest research It provides all of the concepts necessary to enable a reader equipped with some basic mathematical knowledge to enter the world of machine learning using theoretically well founded yet easy to use kernel algorithms and to understand and apply the powerful algorithms that have been developed over the last few years

*Computer Vision - ECCV 2002* Anders Heyden, Gunnar Sparr, Mads Nielsen, Peters Johansen, 2003-08-02 Premiering in 1990 in Antibes France the European Conference on Computer Vision ECCV has been held biennially at venues all around Europe These conferences have been very successful making ECCV a major event to the computer vision community ECCV 2002 was the seventh in the series The privilege of organizing it was shared by three universities The IT University of Copenhagen the University of Copenhagen and Lund University with the conference venue in Copenhagen These universities lie geographically close in the vivid Oresund region which lies partly in Denmark and partly in Sweden with the newly built bridge opened summer 2000 crossing the sound that formerly divided the countries We are very happy to report that this year s conference attracted more papers than ever before with around 600 submissions Still together with the conference board we decided to keep the tradition of holding ECCV as a single track conference Each paper was anonymously refereed by three different reviewers For the first time for ECCV a system with area chairs was used These met with the program chairs in Lund for two days in February 2002 to select what became 45 oral presentations and 181 posters Also at this meeting the selection was made without knowledge of the authors identity
