Eddy,Charlotte L. Rose,Jennifer J. Thomas,Hannah M. Turner,Tracey D. Wade,2025-12-29 This book presents CBT AN 20 a newly developed briefer form of cognitive behavioural therapy CBT for anorexia nervosa designed to treat individuals in 20 sessions helping clinicians to offer effective therapy to more patients and enabling patients to move more quickly towards recovery This manual addresses the key CBT skills needed to deliver effective CBT AN 20 It uses a combination of psychoeducation nutrition exposure therapy and behavioural experiments to overcome starvation and to support essential weight gain stability It then details the skills needed to work with emotional

factors and with body image issues. Importantly it also stresses the meta competences needed to work with anorexia nervosa such as early change motivational work engaging with the anorexic voice and maintaining a working alliance that stresses change. Accompanying the text is a range of useful web based materials to support the clinician reading the manual. These include checklists, psychoeducation materials, measures and videos of skills in action. CBT AN 20's pragmatic structure supports its delivery by both experienced therapists and those newer to the field who are practising under expert supervision. This book is a must read for all levels of practitioners from all disciplines who work with eating disorders.

Anxiety Disorders and Related Conditions Christos Charis, Georgia Panayiotou, 2024-05-23. The volume aims to instigate a dialog between the psychoanalytic and the cognitive behavioral tradition on conceptualization and treatment of anxiety disorders and related conditions through contributions of respective experts. It presents current findings and current theories and conceptualizations with regards to the mechanisms of etiology and maintenance of anxiety and related conditions as well as innovative new or experimental approaches to treatment that target core difficulties found in patients with anxiety. The book integrates basic research with conceptualization and treatment while giving space for multiple perspectives to treatment both psychotherapeutic and pharmacological to be described. Chapters include a conceptualization and treatment of anxiety and panic from psychodynamic perspectives b 2nd wave CBT treatment and the use of virtual reality c 3rd wave ACT perspectives and d neuroendocrine factors and e pharmacotherapy perspectives. Different theoretical approaches are presented highlighting the strengths and the evidence in favour of each approach without promoting any specific perspective but with an effort to highlight common underlying themes like safety behaviors and avoidance, social support and role of learning history. In this way the book will present a combination of theory, science and practice aiming to be an excellent resource for researchers, clinicians and students of mental health professions.

Cognitive Behaviour Therapy Sue Marshall, John Turnbull, 1996. Cognitive behaviour therapy is a well researched and increasingly popular therapeutic approach used for a range of common mental health problems. Many nurses have found that it is a client centred approach which builds on their existing communication and counselling skills. This text reflects these aspects and avoids the traditional disorder focused model. Instead it clarifies the key stages of therapy enabling the reader to see how CBT can be applied to a range of situations in their own practice. Using case studies, dialogues, discussion questions and further reading, this book will demystify cognitive behaviour therapy and provide a practical resource for nurses working in mental health, learning disabilities and community fields as well as with a range of physical health problems.
