Special Effects on the Screen Martin Lefebvre,Marc Furstenau,2025-10-01 Since the very first days of cinema audiences have marveled at the special effects imagery presented on movie screens While long relegated to the margins of film studies special effects have recently become

the object of a burgeoning field of scholarship. With the emergence of a digital cinema and the development of computerized visual effects, film theorists and historians have been reconsidering the traditional accounts of cinematic representation, recognising the important role of special effects. Understood as a constituent part of the cinema, special effects are a major technical but also aesthetic component of filmmaking and an important part of the experience for the audience. In this volume, new directions are charted for the exploration of this indispensable aspect of the cinematic experience. Each of the essays in this collection offers new insight into the theoretical and historical study of special effects. The contributors address the many aspects of special effects from a variety of perspectives, considering them as a conceptual problem, recounting the history of specific special effects techniques, and analysing notable effects films.

Experiencing Other Minds in the Courtroom

Neal Feigenson, 2016-12-26. Sometimes the outcome of a lawsuit depends upon sensations known only to the person who experiences them, such as the buzzing sound heard by a plaintiff who suffers from tinnitus after an accident. Lawyers, litigants, and expert witnesses are now seeking to re-create these sensations in the courtroom using digital technologies to simulate litigants' subjective experiences and thus to help jurors know not merely know about what it is like to be inside a litigant's mind. But with this novel type of evidence comes a host of questions: Can anyone really know what it is like to have another person's sensory experiences? Why should courts allow jurors to see or hear these simulations? And how might this evidence alter the ways in which judges and jurors do justice? In *Experiencing Other Minds in the Courtroom*, Neal Feigenson turns the courtroom into a forum for exploring the profound philosophical, psychological, and legal ramifications of our efforts to know what other people's conscious experiences are truly like. Drawing on disciplines ranging from cognitive psychology to psychophysics to media studies, Feigenson harnesses real examples of digitally simulated subjective perceptions to explain how the epistemological value of this evidence is affected by who creates it, how it is made, and how it is presented. Through his close scrutiny of the different kinds of simulations and the different knowledge claims they make, Feigenson is able to suggest best practices for how we might responsibly incorporate such evidence into the courtroom.

Millennium Film Journal, 1997. [The Moving Image](#), 2007. [Light Years](#). Mark Benjamin Godfrey, 2011. Photography played a critical role in conceptual art of the 1960s and 1970s as artists turned to photography as both medium and subject matter. *Light Years* offers the first major survey of the key artists of this period who used photography to new and inventive ends. Whereas some employed photographic images to create slide projections, photographic canvases, and artists' books, others integrated them into sculptural assemblages and multimedia installations. This book highlights the work of acclaimed international artists such as Vito Acconci, John Baldessari, Mel Bochner, Sol LeWitt, Bruce Nauman, Giuseppe Penone, and Ed Ruscha. Matthew Witkovsky's essay provides the larger context for photography within conceptual art, a theme that is further elaborated in texts by Mark Godfrey, Anne Rorimer, and Joshua Shannon. An essay by Robin Kelsey focuses on the pioneering work of John Baldessari, in which he explored the element of chance, and an essay by Giuliano Sergio illuminates the lesser-known work of
