With this collection of resource recommendations, direction for program development and activities, you'll have students reading proficiently in no time. Many schools and libraries are implementing STEAM programs in the school library makerspace to promote problem solving by allowing students to create their own solutions to a problem through trial and error. In order to enhance literacy development in the STEAM program, however, they need resources for integrating literature into the curriculum. In this collection of resources for doing just that, veteran education professionals and practiced coauthors Liz Knowles and Martha Smith bring readers over eight hundred recommended and annotated books and web resources selected based on research on successfully integrating STEAM and literacy programs and organized by the five STEAM areas. Titles are complemented by discussion questions and problem solving activities that will aid educators in both adding and using the best literature to their STEAM programs for encouraging learning. They start with an existing item, a cotton jumper or a jean jacket, and embellish or alter it in a variety of ways to make it something new. Altered Art is the newest trend in the art and craft world. The first section of the book features tips and techniques that show how to do various creative alterations on fabric: ripping, tearing, painting, and dyeing; beading; adding images and letters; and adding hardware such as grommets, snaps, jewels, and more. The second section of the book includes 30 altered clothing and accessory projects the avid crafter can make at home. Step-by-step photography details the techniques, and large, vibrant color photos of finished projects show off the fashionable projects. The book is filled with accessible, idea-inspiring projects for people interested in creating their own look.
