**Planning, Programming, and Control** Brian Cooke,2004      **Delay Analysis in Construction Contracts** P. John Keane,Anthony F. Caletka,2009-01-26 The most significant unanticipated costs on many construction projects are the financial impacts associated with delay and disruption to the works Assessing these and establishing a causal link from each delay event to its effect contractual liability and the damages experienced as a direct result of each event can be difficult and complex This book is a practical guide to the process of delay analysis and includes an in depth review of the primary methods of delay analysis together with the assumptions that underlie the precise calculations required in any quantitative delay analysis The techniques discussed can be used on projects of any size under all forms of construction contract both domestic and international The authors discuss not only delay analysis techniques but also their appropriateness under given circumstances demonstrating how combined approaches may be applied where necessary They also consider problematic issues including who owns the float concurrent delay early completion programmes and disruption The book which is well illustrated features practical worked examples and case studies demonstrating the techniques commonly used by experienced practitioners This is an invaluable resource to contractors architects engineers surveyors programmers and delay analysts and will also be of interest to clients professional advisors managing extension of time or delay claims as well as construction lawyers who require a better understanding of the underlying assumptions on which many quantitative delay analyses are based

**Management of Construction Projects** Brian Cooke,2014-10-24 Construction Management is a wide ranging discipline but ultimately it is a demanding hands on discipline concerned with the management of people plant and materials all mobilised to complete a building project safely on time on budget and to the client s satisfaction Management of Construction Projects is a highly illustrated series of case studies based on seven live construction management projects demonstrating the very practical nature of managing projects The detailed case studies cover a variety of construction projects varying in value from 1million to 117 million including a major inner city office block a portal framed factory unit a university refurbishment project a superstore car park and a new school building The case studies emphasise detailed on site management procedures and identify a predominantly functional approach to managing projects A number of related chapters covering practical and theoretical aspects of construction management support and illustrate the individual case studies With a strong emphasis on the practical nature of the subject Management of Construction Projects is an ideal introduction to the subject for all students on construction and related degree and diploma programmes It will be of particular interest to students preparing for the CIOB EPA programme and the new NVQ courses at level 4 and 5 in construction management
