these difficult concepts much more quickly and obtain a firmer grasp than with a traditional textbook Thus the colorful diagrams produced by Mathematica give added value to the students Teachers can run the Mathematica or SageMath notebooks in the classroom in order to have their students visualize the dynamics of groups and rings Students have the option of running the notebooks at home and experiment with different groups or rings Some of the exercises require technology but most are of the standard type with various difficulty levels The third edition is meant to be used in an undergraduate single semester course reducing the breadth of coverage size and cost of the previous editions Additional changes include Binary operators are now in an independent section The extended Euclidean algorithm is included Many more homework problems are added to some sections Mathematical induction is moved to Section 1 2 Despite the emphasis on additional software the text is not short on rigor All of the classical proofs are included although some of the harder proofs can be shortened by using technology
