**1. Cells;** All organisms are made up of cells, from single-celled organisms (unicellular) to multicellular organisms.

**2. Need for energy**—All organisms need chemical energy to carry out their functions including metabolism, which is all of the chemical processes that build up or break down materials.

**3. Respond to environment**—All organisms must respond to stimuli to survive.

*Systems*—Related parts interact to form a whole. Examples include molecules that function together; cells that work together to perform a function; different organs that work together; different organisms that interact in an ecosystem.

*Structure and Function* —Function is related to, and dependent upon, structure. Examples include molecular structure and function; cell structure and function; anatomical structure and function.

*Homeostasis*—Stable internal conditions are maintained through automatic responses and through behavior. Examples include temperature regulation; behavioral responses to external stimuli.

*Evolution*—Gradual change in genetic makeup of a population of a species. Examples include adaptations in different environments resulting in different species.

### Section 1.3

*Observing*—Using the senses or tools to gather information

*Forming hypotheses*—Ask a question and try to explain observations

*Testing hypotheses*—Collecting data to support or reject a hypothesis

**Experiencing Power, Generating Authority** Jane A. Hill, Philip Jones, Antonio J. Morales, 2013-11-14 For almost three thousand years Egypt and Mesopotamia were each ruled by the single sacred office of kingship Though geographically near these ancient civilizations were culturally distinct and scholars have historically contrasted their respective conceptualizations of the ultimate authority imagining Egyptian kings as invested with cosmic power and Mesopotamian kings as primarily political leaders In fact both kingdoms depended on religious ideals and political resources to legitimate and exercise their authority Cross cultural comparison reveals the sophisticated and varied strategies that ancient kings used to unify and govern their growing kingdoms Experiencing Power Generating Authority draws on rich material records left behind by both kingdoms from royal monuments and icons to the written deeds and commissions of kings Thirteen essays provocatively juxtapose the relationships Egyptian and Mesopotamian kings had with their gods and religious mediators as well as their subjects and court officials They also explore the ideological significance of landscape in each kingdom since the natural and built environment influenced the economy security and cosmology of these lands The interplay of religion politics and territory is dramatized by the everyday details of economy trade and governance as well as the social crises of war or the death of a king Reexamining established notions of cosmic and political rule Experiencing Power Generating Authority challenges and deepens scholarly approaches to rulership in the ancient world Contributors Mehmet Ali Ata Miroslav B rta Dominique Charpin D Bruce Dickson Eckart Frahm Alan B Lloyd Juan Carlos Moreno Garcia Ludwig D Morenz Ellen Morris Beate Pongratz Leisten Michael Roaf Walther Sallaberger JoAnn Scurlock PMIRC volume 6
