Superintelligence Paths Dangers Strategies:

Superintelligence Nick Bostrom,2014 This profoundly ambitious and original book picks its way carefully through a vast tract of forbiddingly difficult intellectual terrain *Superintelligence* Summary Station Staff,2015-08-21 Learn About The Future Of Artificial Intelligence In A Fraction Of The Time It Takes To Read The Actual Book Today only get this 1 Amazon bestseller for just 2 99 Regularly priced at 9 99 Read on your PC Mac smart phone tablet or Kindle device Inside your cranium is the thing that allows you to read your brain Animals have other abilities like knifelike claws and powerful muscles But our brain has let us create a system for verbal communication science electronics and intimate public arrangement Each generation has done better and progressed farther than the previous generation We have the dominance because we can build the things We could build a superintelligence that could safeguard human values But we d only get one chance because if the superintelligence became unfriendly getting rid of it or changing it would be next to impossible It seems possible that sometime soon there could be an artificial intelligence advancement And a couple chapters of this book are devoted to possible pathways to that But the majority of the book is devoted to what happens next The powers of the superintelligence the decisive choices available Then how do we mold the conditions to get a survivable and favorable outcome Towards the end we look at the big picture and how to avoid catastrophe There may be things in this book Bostrom fails to take into account and he may draw some wrong conclusions There is uncertainty and it is expressed when necessary Here Is A Preview Of What You ll Learn When You Download Your Copy Today How Artificial Intelligence Works And The Way It Will Change The Future The Reason Why It Would Be Difficult For One Organization To Dominate The Artificial Intelligence Industry Learn How The World Needs To Work Together In Order To Create A Safe And Responsible Form Of Artificial Intelligence Download Your Copy Today The contents of this book are easily worth over 9 99 but for a limited time you can download the summary of Nick Bostrom s *Superintelligence* by for a special discounted price of only 2 99

SUPERINTELLIGENCE Nick Bostrom,2014 *Digital new deal: the quest for a natural law in a digital society* Riccardo Genghini,2021-06-08 The quest for a natural law that can be applied to a digital society may sound like an oxymoron but it is a necessary quest if we hope to institute a Digital New Deal Hence the title of this book Today once again mass media is disrupting society much as radio and cinema were used to buttress totalitarianism in the 1920s or even worse in the 15th century when the printing of the Bible unleashed 100 years of war plague and instability Things get messy when people disagree on facts rather than ideas Natural law springs from the features of the physical world which contains boundaries an inside and an outside limited resources living individuals objects living animals living plants climate the four elements etc None of this is a given in the digital world which looks today like feudalism in a box with fire walled communities run by unelected autocrats system administrators ruling over countless subjects whose identities are tied to the domain of the fire walled community and whose rights can only be enforced by the autocratic system administrator This dystopic reality is

neither necessary nor inevitable It is the consequence of bad technical design and inappropriate business models which are destroying the spirit of free pluralism that enabled them to thrive in the first place Information technology has its own ontology and natural rules and we must understand them and learn to regard them as being among the founding legal principles of our free open pluralistic societies Of the 12 founding digital principles addressed here the most important may well be that we must each own and control our digital identities In the world created by information technology everyone and everything should possess a UID a unique identifier Without one we are just helpless particles lost in a dark and hostile universe

The Promise and Peril of AI and IA Ted Peters, 2023-12-31 How should public theologians and social ethicists assess anticipate and amend the projected path taken by Artificial Intelligence and Intelligence Amplification With the advent of generative AI along with large language models suddenly our techie whiz kids are sounding the fire alarm Will a Frankenstein monster escape its creator's design Will more highly evolved superintelligence render today's human race extinct Is this generation morally obligated to give birth to a tomorrow in which we outdated humans can no longer participate This book collects foresighted analyses and recommendations from computer scientists neuroscientists AI ethicists along with Christian and Muslim theologians

AI and IA Ted Peters, 2019-09-01 Will advances in AI Artificial Intelligence or IA Intelligence Amplification lead to the extinction of the human race as we know it Or will superintelligence lead to utopia In this collection of thoughtful essays we must first get clear on the question is artificial intelligence actually intelligent or not Only with an affirmative answer could our techies proceed toward their goal the creation of a superintelligence that leads through transhumanism to a posthuman entity that would replace today's human Should today's moderately intelligent human species voluntarily go extinct to make way for a more intelligent species to succeed us in evolutionary history These scientific questions are addressed in this volume in light of their theological ethical and social

Is Law Computable? Simon Deakin, Christopher Markou, 2020-11-26 What does computable law mean for the autonomy authority and legitimacy of the legal system Are we witnessing a shift from Rule of Law to a new Rule of Technology Should we even build these things in the first place This unique volume collects original papers by a group of leading international scholars to address some of the fascinating questions raised by the encroachment of Artificial Intelligence AI into more aspects of legal process administration and culture Weighing near term benefits against the longer term and potentially path dependent implications of replacing human legal authority with computational systems this volume pushes back against the more uncritical accounts of AI in law and the eagerness of scholars governments and LegalTech developers to overlook the more fundamental and perhaps bigger picture ramifications of computable law With contributions by Simon Deakin Christopher Markou Mireille Hildebrandt Roger Brownsword Sylvie Delacroix Lyria Bennet Moses Ryan Abbott Jennifer Cobbe Lily Hands John Morison Alex Sarch and Dilan Thampapillai as well as a foreword from Frank Pasquale Issues in Science and Technology, 2015
