Determination in Cloud Computing. Data Transmission and Privacy with Subcontractors Jutta Grosse Wichtrup, 2015-10-27
Master's Thesis from the year 2015 in the subject Law European and International Law Intellectual Properties grade 95.5
Centre International de Formation Européenne Nice CIFE European Online Academy course European Law Informational Self
Determination in Cloud Computing Data Transmission and Privacy with Subcontractors language English abstract The paper
analyses the constraints of the current European directive on data protection regarding the free and active exercise of the
right to informational self-determination in cloud computing with subcontractor chains The analysis focuses in particular on
the personal and geographical scope of the protection of personal data on the legitimation of data processing under the
aspect of data transmission into secure and unsecure third countries with subcontractor involvement Herein it will be
critically analysed whether the options under which it is possible to process personal data will deliver sufficient privacy
security in cloud computing Furthermore the paper examines the effectiveness and the consequences of possible legitimation
of processing personal data in cloud computing Also will be regarded the legitimation options to include subcontractors in
complex cloud computing landscapes in secure and unsecure third countries The data subject and the cloud user position and
chances to execute their rights of informational self-determination in distributed cloud computing landscapes will be critical
looked at Based on the multiple challenges that the personal data faces in complex cloud computing landscapes various
improvement potentials addressed to different actors emphasize the necessity to reduce the risk to the data subject's
informational self-determination in cloud computing Finally the recent regulation on general data protection that was
published by the Council on 11th June 2015 will be cross-checked against the identified gaps of the currently existing data
protection directive with an emphasis on the requirements to achieve informational self-determination
