A beautifully accessible guide. One of the best books yet written on data and algorithms. Times UK. If you were accused of a crime, who would you rather decide your sentence: a mathematically consistent algorithm incapable of empathy or a compassionate human judge prone to bias and error? What if you want to buy a driverless car and must choose between one programmed to save as many lives as possible and another that prioritizes the lives of its own passengers? And would you agree to share your family's full medical history if you were told that it would help researchers find a cure for cancer? These are just some of the dilemmas that we are beginning to face as we approach the age of the algorithm when it feels as if the machines reign supreme. Already, these lines of code are telling us what to watch, where to go, whom to date, and even whom to send to jail. But as we rely on algorithms to automate big important decisions in crime, justice, healthcare, transportation, and money, they raise questions about what we want our world to look like. What matters most: Helping doctors with diagnosis or preserving privacy? Protecting victims of crime or preventing innocent people from being falsely accused? Hello World takes us on a tour through the good, the bad, and the downright ugly of the algorithms that surround us on a daily basis. Mathematician Hannah Fry reveals their inner workings, showing us how algorithms are written and implemented and demonstrates the ways in which human bias can literally be written into

the code By weaving in relatable real world stories with accessible explanations of the underlying mathematics that power algorithms Hello World helps us to determine their power expose their limitations and examine whether they really are improvement on the human systems they replace *English File Intermediate Student's Book* Christina Latham-Koenig, Clive Oxenden, 2019-05 Just when you thought it couldn't get any better A new edition of the best selling English File the best way to get your students talking A blend of completely new lessons updated texts and activities together with the refreshing and fine tuning of some favourite lessons from New English File English File third edition provides the right mix of language motivation and opportunity to get students talking English File third edition offers more support for teachers and students Teacher's Book provides over 100 photocopiables to save preparation time plus extra tips and ideas Classroom Presentation Tool brings your classroom to life with the Student's Book and Workbook on screen and interactive Student's book Clive Oxenden, Christina Latham-Koenig, 2006 The Moving Frontier Lois Labrianidis, 2019-06-04 Originally published in 1992 and based on two theoretical approaches the Global Commodity Chain and the Global Production Network this book investigates the multitude of processes as well as diverse consequences of global integration upon industries regions enterprises and employees In doing so it draws from the experience of Western and Eastern and South eastern Europe These European cases are complemented with evidence from Kenya Thailand as well as US China India and Mexico The book explores multiple causes of decentralization arguing beyond the pursuit of cheap and adaptable labour It goes on to argue that the effects of delocalization within Europe unlike those in the rest of the developed world are less negative than usually portrayed It concludes by putting forward recommendations for best future practice of successful adjustment strategies and examines how these might be adopted elsewhere in the world New English File Clive Oxenden, Christina Latham-Koenig, 2008 *New English File* Clive Oxenden, Christina Latham-Koenig, Paul Seligson, Tracy Byrne, 2006 **How to Do Everything with Your Genealogy** George G.
