Scientific Computing in Electrical Engineering Angelo Marcello Anile, Giuseppe Ali, G. Mascali, 2007-01-10 This book is a collection of papers presented at the last Scientific Computing in Electrical Engineering SCEE Conference held in Sicily in 2004 The series of SCEE conferences aims at addressing mathematical problems which have a relevancy to industry The areas covered at SCEE 2004 were Electromagnetism Circuit Simulation Coupled Problems and General mathematical and computational methods

*MICAI 2008: Advances in Artificial Intelligence* Alexander Gelbukh, Eduardo F. Morales, 2008-10-07 The Mexican International Conference on Artificial Intelligence MICAI a yearly international conference series organized by the Mexican Society for Artificial Intelligence SMIA is a major international AI forum and the main event in the academic life of the country's growing AI community In 2008 Mexico celebrates the 50th anniversary of development of computer science in the country in 1958 the first computer was installed at the National Autonomous University of Mexico UNAM Nowadays computer science is the country's fastest growing research area The proceedings of the previous MICAI events were published by Springer in its Lecture Notes in Artificial Intelligence LNAI series vol 1793 2313 2972 3789 4293 and 4827 Since its foundation in 2000 the conference has been growing in popularity and improving in quality This volume contains the papers presented at the oral session of the 7th Mexican International Conference on Artificial Intelligence MICAI 2008 held October 27-31 2008 in Atizapán de Zaragoza Mexico The conference received for evaluation 363 submissions by 1 032 authors from 43 countries see Tables 1 and 2 This volume contains revised versions of 94 papers by 308 authors from 28 countries selected according to the results of an international reviewing process Thus the acceptance rate was 25.9% The book is structured into 20 thematic fields representative of the main current areas of interest for the AI community plus a section of invited papers

**Modeling and Application of Electromagnetic and Thermal Field in Electrical Engineering** Zhiguang Cheng, Norio Takahashi, Behzad Forghani, 2019-12-03 Co-authored by an international research group with a long standing cooperation this book focuses on engineering oriented electromagnetic and thermal field modeling and application It presents important contributions including advanced and efficient finite element analysis used in the solution of electromagnetic and thermal field problems for large and multi scale engineering applications involving application script development magnetic measurement of both magnetic materials and components under various even extreme conditions based on well established standard and non standard experimental systems and multi level validation based on both industrial test systems and extended TEAM P21 benchmarking platform Although these are challenging topics they are useful for readers from both academia and industry

**Hosting Capacity Aspects in Distribution Networks Towards Sustainable Energy Systems** Hossam H. H. Mousa, Karar Mahmoud, Matti Lehtonen, 2025-04-29 Hosting Capacity Aspects in Distribution Networks Towards Sustainable Energy Systems is a comprehensive guidebook that delves into the critical aspects of power systems It emphasizes the essential developments necessary to support the transition towards

sustainable energy sources The book begins by laying down the fundamental principles of hosting capacity in energy systems highlighting modern challenges in the shift to renewable and distributed energy sources It underscores the pivotal role hosting capacity plays in the planning and operation of successful systems offering readers a solid foundation on which to build their understanding Subsequent chapters are dedicated to providing detailed explanations on various practical hosting capacity calculation methods and enhancement techniques The book also introduces available tools and software solutions to address hosting capacity issues By compiling the latest insights and advancements in this crucial yet under explored area this book serves as an invaluable resource for students researchers and engineers It aids in planning hosting capacity aspects for the successful integration of renewable and sustainable energy systems Outlines the fundamental concepts of hosting capacity and its relation to sustainable energy systems Provides a range of accurate flexible options of tools software calculations and enhancement techniques Supports readers in mastering the latest theoretical and practical developments
