within the context of South African as well as European Modernism The Body in Late Medieval and Early Modern Culture Darryll Grantley, Nina Taunton, 2000 Taking as its chronological starting point the female body of late medieval devotional literature the volume moves on to a consideration of the representation of gendered bodies in later literature It then proceeds to examine sixteenth century occupational orderings of the male body in education the civil service and the army and involves explorations into a variety of rituals for the purification ordering and disciplining of the flesh It includes enquiries into the miraculous royal body demon bodies the virtual body of satire and ends the late seventeenth century with dramatic representations of the diseased body and the grotesque bodies of travellers tales as signifiers of racial difference It pushes forward post modern notions of the body as a site for competing discourses It provides new dimensions to fantasies rituals and regulations in narratives fictions of the body as identifications of forms of knowledge unique to the early modern period Each of the essays sheds new light on how these late medieval and early modern narratives function to produce specialized and discrete languages of the body that cannot be understood simply in terms say of religion philosophy or physiology but produce their own discrete forms of knowledge Thus the essays materially contribute to an understanding of the relationship between the body and spatial knowledge by giving new bearings on epistemologies built upon pre modern perceptions about bodily spaces and boundaries They address these issues by analysing forms of knowledge constructed through regulations of the body fantasies about extensions to the body and creations of bodily psychic intellectual and spiritual space The essays pose important questions about how these epistemologies offer different investments of knowledge into structures of power What constitutes these knowledges What are the politics of corporeal spaces In what forms of knowledge about spatial and bodily perceptions and practices are these early modern narratives embedded What ideologies shape and contain them The collection deliberately incorporates a period range which encompasses considerable cultural and ideological shifts that impact upon perceptions of the body The choice of essays in the volume recognizes both continuities and discontinuities between perceptions of the body in the medieval and early modern periods PC World Greg Harvey, 1993 Bestselling author and WordPerfect guru Greg Harvey brings you the ultimate WordPerfect tutorial and reference complete with valuable software containing document templates macros and other handy WordPerfect tools Heavily illustrated and loaded with hundreds of tips and detailed hands on examples that demonstrate how WordPerfect s powerful features can be used to solve real world problems **Advanced Microsoft Office 2000** Meredith Flynn, 2000
