In Search of Technological Excellence John Heywood,2025-09-04 The notion that Britain was losing its international
 industrial competitiveness has preoccupied governments since the Second World War Policymakers have sought to address
 this over the years and yet Britain s relative industrial decline has appeared to continue raising questions about its root
 causes In Search of Technological Excellence analyses the policymaking and policy implementation in the education of
 engineers and technologists from the 1945 report of the Percy Committee on Higher Technological Education to the
 conclusion of the Thatcher government s Enterprise in Higher Education Initiative Using a plethora of previously
 unpublished sources this book focuses on the untold story of what the reports of the three key committees in this fifty year
 period Percy 1945 Fielden 1963 and Finniston 1980 actually achieved in secondary and higher technological education The
 core themes of this volume include industrial training and its assessment the controversy over the structure of industrial
 sandwich courses the perceived requirements for qualified specialists the manpower controversy curriculum development
 creativity and innovation in engineering engineers as managers and engineering in schools Thought provoking and
 comprehensive In Search of Technological Excellence reflects on perennial problems to help clarify how this history can
 inform policymaking today and will be of interest to policymakers practitioners and students in engineering education and
