Contemporary Field Research Robert M. Emerson, 2001

Entering the Field in Qualitative Field Research Hameed Chughtai, Michael David Myers, 2021 The concept of the field is significant in ethnographic research as well as qualitative research methods more generally However how a field researcher enters the field is usually taken for granted after gaining access to the field We suggest that entrance is a distinct phase of fieldwork that differs from negotiating access Entrance is not a trivial event rather it is a rite of passage into a complex practice world and marks a critical field moment Drawing on our ethnography and insights from hermeneutics and anthropology we show that a practical understanding of the field

represents a fusion of horizons where a fieldworker is thrown The concept of thrownness highlights the fact that the fieldworkers own historicity and prejudices affect their entrance into the field hence entrance into the field orientates an ethnographer in the field and influences the entire period of fieldwork that follows Our theorizing is intended as a contribution towards advancing the discussion of qualitative research methods Full paper available at <https://doi.org/10.1111/isj.12124>
