Carayannis, 2025-09-19 The presented ideas create and shape the vision of a Manifesto of Higher Education Governance Fractals are typically understood as self similar structures but this concept is expanded to include self different fractals These fractals align with a Philosophy of Dialectics where opposing forces thesis and antithesis can either create disruption or when managed effectively drive creativity innovation and development Because self different fractal systems operate in multiple modes they hold greater potential for fostering innovation This conceptual exploration investigates innovation in higher education through dialectical approaches presenting the entrepreneurial university as a thesis the academic firm as an antithesis and epistemic governance as a synthesis Epistemic governance plays a key role in motivating innovation by integrating pluralistic knowledge and innovation modes The concept of self different fractal innovation systems structures that embody multiple interacting modalities enhances innovation potential through their fluid complexity Good and effective governance of these systems encourages continual knowledge evolution enabling the development of next knowledge This process guided by the dialectics of innovation forms new integrated structures and networks The book emphasizes interdisciplinary and transdisciplinary approaches with the latter involving collaboration between scholars and user
