The Rubato Composer Music Software
Gérard Milmeister,2009-04-05 Both modern mathematical music theory and computer science are strongly influenced by the theory of categories and functors One outcome of this research is the data format of denotators which is based on set valued presheaves over the category of modules and affine homomorphisms The functorial approach of denotators deals with generalized points in the form of arrows and allows the construction of a universal concept architecture This architecture is ideal for handling all aspects of music especially for the analysis and composition of highly abstract musical works This book presents an introduction to the theory of module categories and the theory of denotators as well as the design of a software system called Rubato Composer which is an implementation of the category theoretic concept framework The application is written in portable Java and relies on plug in components so called rubettes which may be combined in data flow networks for the generation and manipulation of denotators The Rubato Composer system is open to arbitrary extension and is freely available under the GPL license It allows the developer to build specialized rubettes for tasks that are of interest to composers who in turn combine them to create music It equally serves music theorists who use them to extract information from and manipulate musical structures They may even develop new theories by experimenting with the many parameters that are at their disposal thanks to the increased flexibility of the functorial concept architecture Two contributed chapters by Guerino Mazzola and Florian Thalmann illustrate the application of the theory as well as the software in the development of compositional tools and the creation of a musical work with the help of the Rubato framework

Music Theory and Its Sources André Barbera, 1990 *Music in Theory and Practice* Bruce Benward, 1985 Volume II of *Music in Theory and Practice* is an introduction to musical styles from the Renaissance to the present. It includes more complex chords, an emphasis on larger forms and strategies for composition analysis. The goal of the text is to instruct readers on the practical application of knowledge. The analytical techniques presented are carefully designed to be clear, uncomplicated, and readily applicable to any repertoire.

Music Theory Earl Henry, 1985 Provides a historical analytical approach to the study of theory and harmony and accomplishes this in an informal and practical style. The philosophy underlying all facets of the book is simply stated, although theory in the abstract is important; it is the practical application of theoretical principles that is the day-to-day business of most professional musicians. Analysis is the first step in understanding the use of tonal materials and style differences. Four basic parameters of music—melody, harmony, rhythm, and form—are emphasized. Another area of emphasis in this text is stylistic composition. Preface.

Music Theory and Analysis Anne-Emmanuelle Ceulemans, Bonnie J. Blackburn, 2001 *Sounding Values* Scott Burnham, 2017-05-15 For several decades Scott Burnham has sought to bring a ready ear and plenty of humanistic warmth to musicological inquiry. *Sounding Values* features eighteen of his essays on mainstream Western music, music theory, aesthetics, and criticism. In these writings, Burnham listens for the values, aesthetic, ethical, intellectual of those who have created influential discourse about music, while also listening for the values of the music for which that discourse has been generated. The first half of the volume confronts pressing issues of historical theory and aesthetics, including intellectual models of tonal theory, leading concepts of sonata form, translations of music into poetic meaning, and recent rifts and rapprochements between criticism and analysis. The essays in the second half can be read as a series of critical appreciations, engaging some of the most consequential reception tropes of the past two centuries: Haydn and humor, Mozart and beauty, Beethoven and the sublime, Schubert and memory.
