Performance by Design Daniel A. Menascé, Virgilio A. F. Almeida, Larry Dowdy, 2004 Practical real world solutions are given to potential problems covering the entire system life cycle This book describes how to map real life systems databases data centers and e commerce applications into analytic performance models The authors elaborate upon these models and use them to help the reader better understand performance issues Fundamentals of Performance Evaluation of Computer and Telecommunication Systems Mohammed S. Obaidat, Nouredine A. Boudriga, 2010-01-26 The only singular all encompassing textbook on state of the art technical performance evaluation Fundamentals of Performance Evaluation of Computer and Telecommunication Systems uniquely presents all techniques of performance evaluation of computers systems communication networks and telecommunications in a balanced manner Written by the renowned Professor Mohammad S Obaidat and his coauthor Professor Nouredine Boudriga it is also the only resource to treat computer and telecommunication systems as inseparable issues The authors explain the basic concepts of performance evaluation applications performance evaluation metrics workload types benchmarking and characterization of workload This is followed by a review of the basics of probability theory and then the main techniques for performance evaluation namely measurement simulation and analytic modeling with case studies and examples Contains the practical and applicable knowledge necessary for a successful performance evaluation in a balanced approach Reviews measurement tools benchmark programs design of experiments traffic models basics of queueing theory and operational and mean value analysis Covers the techniques for validation and verification of simulation as well as random number generation random variate generation and testing with examples Features numerous examples and case studies as well as exercises and problems for use as homework or programming assignments Fundamentals of Performance Evaluation of Computer and Telecommunication Systems is an ideal textbook for graduate students in computer science electrical engineering computer engineering and information sciences technology and systems It is also an excellent reference for practicing engineers and scientists

Capacity Management - A Practitioner Guide Annelies van der Veen, Jan van Bon, 2020-06-11 Capacity Management is described in most key ITSM frameworks ITIL ISO 20000 Microsoft Operations Framework MOF and the Application Service Library ASL all note the importance of Capacity Management This major title meets the need for an in depth practical guide to this critical process Written and reviewed by some of the world s most respected experts in this field it shows how Capacity Management best practice can support provision of a consistent acceptable service level at a known and controlled cost Practical advice covers the essential control of two balances Supply versus demand and resources versus cost In times of mean frugal economic measures it is essential to focus on those practices that are effective and yield practical results In enlightened times of sustainability it is also a requirement to find solutions that satisfy the criteria for greenness This excellent title shows how Capacity Management works not only within an IT environment but also why it is pivotal in meeting

high profile business demands Aligns with ISO IEC 20000 and ITIL ISO IEC lists a set of required capacity management deliverables ITIL outlines what should be done in capacity management this book starts to describe how to do it Covers details of what capacity management is all about what is capacity management why do it benefits and cost benefit analysis how to do it data flows and activities who does it roles and perspectives implementation maintenance improvement tools Provides comprehensive templates and checklists objectives interfaces and data flows sub practices and activities metrics application sizing parameters data for modelling deliverables reports CMMI levels KPIs risk matrix sample capacity plan

Model-Driven Software Development: Integrating Quality Assurance Rech, Jörg, Bunse, Christian,2008-08-31 Covers important concepts issues trends methodologies and technologies in quality assurance for model driven software development

Architectures for Adaptive Software Systems Raffaella Mirandola, Ian Gorton, Christine Hofmeister,2009-06-08 Much of a software architect's life is spent designing software systems to meet a set of quality requirements General software quality attributes include scalability security performance or reliability Quality attribute requirements are part of an application's non functional requirements which capture the many facets of how the functional requirements of an application are achieved Understanding modeling and continually evaluating quality attributes throughout a project lifecycle are all complex engineering tasks which continue to challenge the software engineering scientific community While we search for improved approaches methods formalisms and tools that are usable in practice and can scale to large systems the complexity of the applications that the software industry is challenged to build is ever increasing Thus as a research community there is little opportunity for us to rest on our laurels as our innovations that address new aspects of system complexity must be deployed and validated To this end the 5th International Conference on the Quality of Software Architectures QoSA 2009 focused on architectures for adaptive software systems Modern software systems must often reconfigure their structure and behavior to respond to continuous changes in requirements and in their execution environment In these settings quality models are helpful at an architectural level to guide systematic model driven software development strategies by evaluating the impact of competing architectural choices

Performance Problem Diagnostics by Systematic Experimentation Wert, Alexander,2018-03-29 In this book we introduce an automatic experiment based approach for performance problem diagnostics in enterprise software systems The proposed approach systematically searches for root causes of detected performance problems by executing series of systematic performance tests The presented approach is evaluated by various case studies showing that the presented approach is applicable to a wide range of contexts

Modeling and Prediction of I/O Performance in Virtualized Environments Noorshams, Omar-Qais,2017-03-10 We present a novel performance modeling approach tailored to I/O performance prediction in virtualized environments The main

idea is to identify important performance influencing factors and to develop storage level I O performance models To increase the practical applicability of these models we combine the low level I O performance models with high level software architecture models Our approach is validated in a variety of case studies in state of the art real world environments

Model-Driven Online Capacity Management for Component-Based Software Systems André van

Hoorn,2014-10-15 Capacity management is a core activity when designing and operating distributed software systems Particularly enterprise application systems are exposed to highly varying workloads Employing static capacity management this leads to unnecessarily high total cost of ownership due to poor resource usage efficiency This thesis introduces a model driven online capacity management approach for distributed component based software systems called SLAStic The core contributions of this approach are a modeling languages to capture relevant architectural information about a controlled software system b an architecture based online capacity management framework based on the common MAPE K control loop architecture c model driven techniques supporting the automation of the approach d architectural runtime reconfiguration operations for controlling a system s capacity as well as e an integration of the Palladio Component Model A qualitative and quantitative evaluation of the approach is performed by case studies lab experiments and simulation Proceedings ,2005
