getting rich quickly not that there's anything wrong with that but it's about gaining knowledge and building your capacity in order to live a good life. What's a good life? I don't know; everyone's definition is different. What's important is that you take the time to define what a good life is for you and then align your financial decisions with that. The goal of this book is to help you think about your finances in such a way that you have the independence to lead the life you want to live, to give you as much control as possible over your financial situation so that your finances don't prevent you from living the life you want. I say book because that's what Amazon calls it, but it's more like a really long blog post. I wrote it because finances and financial decisions are such a huge part of everyone's life that they should take the time to thoroughly educate themselves. Since many folks won't do that, this book is an attempt to quickly give them the basics and hopefully encourage them and give them the confidence to learn more. I am not a financial planner; I have taught students mathematics and computer science for over thirty years but have no formal training in personal finance or investing and no certifications. I am simply a lifelong learner, constantly curious and have been interested in personal finance since working in a credit union during high school and college and continued to be curious and learn more about finance during my career as a public school teacher. Over my years as a teacher, I discovered that not only did my students not know much about personal finance but neither did my family, friends, and colleagues. I often served as a resource for those folks. Partially as a result of that experience, I see the necessity for a book such as this as I wanted to do my part to try to help others become financially literate. While it would be nice to make a little bit of money from this, that's not really my expectation or my goal. This is a passion project for me. I hope folks find it helpful. If you do read it, it would be helpful if you could leave a review on Amazon and/or email me at karl.fischlearning.com, a testimonial for the accompanying website. I would also love constructive feedback at bit.ly/tldrfeedback. So about thirty pages. About an hour. Ready to get started. Future you will thank you.

Reviews: This is what I needed when I was in high school. It is also what I needed when I was in college and when I bought my first car and when I bought my first house and when I opened my first credit card. Every high school student in America should have to pass a class that uses this book. The real-world examples are relatable and make the reader feel like they are armed with the knowledge they need. It doesn't just make you book-smart; it makes you street-smart.
